

TECHNICAL REPORT

Display lighting unit -
Part 1-6: Quantum dot films and quantum dot diffuser plates used in backlight
unit

About the IEC

The International Electrotechnical Commission (IEC) is the leading global organization that prepares and publishes International Standards for all electrical, electronic and related technologies.

About IEC publications

The technical content of IEC publications is kept under constant review by the IEC. Please make sure that you have the latest edition, a corrigendum or an amendment might have been published.

IEC publications search -

webstore.iec.ch/advsearchform

The advanced search enables to find IEC publications by a variety of criteria (reference number, text, technical committee, ...). It also gives information on projects, replaced and withdrawn publications.

IEC Just Published - webstore.iec.ch/justpublished

Stay up to date on all new IEC publications. Just Published details all new publications released. Available online and once a month by email.

IEC Customer Service Centre - webstore.iec.ch/csc

If you wish to give us your feedback on this publication or need further assistance, please contact the Customer Service Centre: sales@iec.ch.

IEC Products & Services Portal - products.iec.ch

Discover our powerful search engine and read freely all the publications previews, graphical symbols and the glossary. With a subscription you will always have access to up to date content tailored to your needs.

Electropedia - www.electropedia.org

The world's leading online dictionary on electrotechnology, containing more than 22 500 terminological entries in English and French, with equivalent terms in 25 additional languages. Also known as the International Electrotechnical Vocabulary (IEV) online.

CONTENTS

FOREWORD.....	3
1 Scope.....	5
2 Normative references.....	5
3 Terms, definitions and abbreviated terms.....	5
3.1 Terms and definitions.....	5
3.2 Abbreviated terms.....	6
4 Quantum dots used in BLU technologies and applications.....	6
4.1 General.....	6
4.2 QD-LCF.....	7
4.3 QD-DP.....	7
4.4 Other applications.....	8
5 Optical characteristics.....	8
5.1 General.....	8
5.2 Factors influencing colour gamut of the LCD module using QD-BLU.....	9
5.3 Factors influencing luminance of the BLU using quantum dots.....	10
5.4 Factors influencing uniformity of the BLU using quantum dots.....	10
6 Mechanical and environmental characteristics.....	10
6.1 General.....	10
6.2 High temperature storage test.....	12
6.3 High temperature and high humidity test.....	13
6.4 Blue light operation test.....	14
6.5 Release force.....	17
7 Discussion and possible future standardization.....	17
7.1 General.....	17
7.2 Future standardization for QD-LCF.....	17
7.3 Future standardization for QD-DP.....	17
7.4 Others.....	17
Annex A (informative) High flux blue light operating test.....	18
Bibliography.....	21
Figure 1 – Schematic of LCD with QD-LCF BLU.....	7
Figure 2 – Schematic of LCD with QD-DP BLU.....	8
Figure 3 – Spectrum differences for conventional and QD-based BLU and LCD.....	9
Figure 4 – Chromaticity gamut of conventional LCD and QD-based LCD.....	10
Figure 5 – Typical structure of QD-LCF.....	11
Figure 6 – Typical structure of QD-DP.....	11
Figure 7 – Example of change of chromaticity coordinates and luminance under high temperature storage test.....	12
Figure 8 – BLU structure used in test.....	13
Figure 9 – Example of change of chromaticity coordinates and luminance under high temperature and high humidity test.....	14
Figure 10 – Example of change of colour coordinate and luminance after blue light operating test at high temperature.....	16
Figure 11 – Blue light operation test condition.....	16
Figure A.1 –Schematic of an example of the high flux blue light aging equipment.....	18

Figure A.2 –Example of change of chromaticity coordinates and luminance after high flux blue aging test	19
Figure A.3 – The curve of blue LED irradiance and failure time	20
Table 1 – Example of BLU optical characteristics using quantum dots.....	8
