About the IEC

The International Electrotechnical Commission (IEC) is the leading global organization that prepares and publishes International Standards for all electrical, electronic and related technologies.

About IEC publications

The technical content of IEC publications is kept under constant review by the IEC. Please make sure that you have the latest edition, a corrigendum or an amendment might have been published.

IEC publications search -

webstore.iec.ch/advsearchform

The advanced search enables to find IEC publications by a variety of criteria (reference number, text, technical committee, ...). It also gives information on projects, replaced and withdrawn publications.

IEC Just Published - webstore.iec.ch/justpublished

Stay up to date on all new IEC publications. Just Published details all new publications released. Available online and once a month by email.

IEC Customer Service Centre - webstore.iec.ch/csc

If you wish to give us your feedback on this publication or need further assistance, please contact the Customer Service Centre: sales@iec.ch.

IEC Products & Services Portal - products.iec.ch

Discover our powerful search engine and read freely all the publications previews, graphical symbols and the glossary. With a subscription you will always have access to up to date content tailored to your needs.

Electropedia - www.electropedia.org

The world's leading online dictionary on electrotechnology, containing more than 22 500 terminological entries in English and French, with equivalent terms in 25 additional languages. Also known as the International Electrotechnical Vocabulary (IEV) online.

CONTENTS

FOREWORD.....	2
1 Scope.....	4
2 Normative references	4
3 Terms, definitions and abbreviated terms	4
3.1 Terms and definitions	4
3.2 Abbreviated terms	5
4 Product life cycle assessment	5
4.1 General.....	5
4.2 Product specific rules	5
4.2.1 Functional unit, declared unit and reference flow description for metallic or fibre optic communication and data wires and cables	5
4.2.2 Functional unit, declared unit and reference flow description for control and command wires and cables.....	6
4.2.3 System boundaries	7
4.2.4 Life cycle inventory	8
4.2.5 Allocation rules	17
4.2.6 Units.....	17
4.2.7 Data quality	17
4.3 Development of scenarios	17
4.4 Life cycle impact assessment	17
4.4.1 General	17
4.4.2 Common base of mandatory indicators.....	18
4.4.3 Common base of indicators	19
4.5 Additional assumptions	19
4.5.1 Assumptions for extrapolation to a homogenous product family	19
4.5.2 Rules applying for the aggregation of environmental impacts on system level	20
4.5.3 Rules for carbon offset, carbon capture and storage, delayed emissions and biogenic carbon capture	20
4.6 LCA report	21
Annex A (informative) Applications	22
Bibliography	23
Figure 1 – Interpolation scheme	20
Table 1 – Use stage overview	7
Table 2 – Balanced copper communication cables data transmission loss	11
Table 3 – Balanced copper communication cables remote powering loss	13
Table 4 – Optical fibre cables transmission loss	16
Table 5 – End of life stages overview	17
Table A.1 – Table of applications and their reference lifetime and use rate	22

INTERNATIONAL ELECTROTECHNICAL COMMISSION

Environmental declaration - Part 1: Communication wires and cables - Product specific rules

FOREWORD

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as "IEC Publication(s)"). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) IEC draws attention to the possibility that the implementation of this document may involve the use of (a) patent(s). IEC takes no position concerning the evidence, validity or applicability of any claimed patent rights in respect thereof. As of the date of publication of this document, IEC had not received notice of (a) patent(s), which may be required to implement this document. However, implementers are cautioned that this may not represent the latest information, which may be obtained from the patent database available at <https://patents.iec.ch>. IEC shall not be held responsible for identifying any or all such patent rights.

IEC TR 62839-1 has been prepared by IEC technical committee 46: Cables, wires, waveguides, RF connectors, RF and microwave passive components and accessories. It is a Technical Report.

This second edition cancels and replaces the first edition published in 2014. This edition constitutes a technical revision.

This edition includes the following significant technical changes with respect to the previous edition:

- a) The term "accessory products" has been removed from the title and the text as accessories are covered by IEC TR 62839-2.
- b) The consideration of remote powering was added for the evaluation of the use stage.
- c) Guidance was added with respect to evaluate the use stage of certain coaxial cables.
- d) Update of the entire document to reflect a complete life cycle assessment.
