About the IEC

The International Electrotechnical Commission (IEC) is the leading global organization that prepares and publishes International Standards for all electrical, electronic and related technologies.

About IEC publications

The technical content of IEC publications is kept under constant review by the IEC. Please make sure that you have the latest edition, a corrigendum or an amendment might have been published.

IEC publications search -

webstore.iec.ch/advsearchform

The advanced search enables to find IEC publications by a variety of criteria (reference number, text, technical committee, ...). It also gives information on projects, replaced and withdrawn publications.

IEC Just Published - webstore.iec.ch/justpublished

Stay up to date on all new IEC publications. Just Published details all new publications released. Available online and once a month by email.

IEC Customer Service Centre - webstore.iec.ch/csc

If you wish to give us your feedback on this publication or need further assistance, please contact the Customer Service Centre: sales@iec.ch.

IEC Products & Services Portal - products.iec.ch

Discover our powerful search engine and read freely all the publications previews, graphical symbols and the glossary. With a subscription you will always have access to up to date content tailored to your needs.

Electropedia - www.electropedia.org

The world's leading online dictionary on electrotechnology, containing more than 22 500 terminological entries in English and French, with equivalent terms in 25 additional languages. Also known as the International Electrotechnical Vocabulary (IEV) online.

CONTENTS

FOREWORD	3
1 Scope	5
2 Normative references	5
3 Terms and definitions	5
4 General	5
5 Selection between HVDC and AC	7
5.1 Consideration of overall network planning	7
5.1.1 Overall network planning	7
5.1.2 Connection topologies	7
5.2 Consideration of transmission capacity	8
5.3 Consideration of operation requirements	8
5.3.1 System fault and stability	8
5.3.2 Voltage regulation and reactive power compensation	8
5.4 Consideration of costs	9
5.5 Consideration of other aspects	9
6 HVDC solutions	10
6.1 Main circuit topologies	10
6.1.1 Asymmetrical monopolar HVDC transmission system	10
6.1.2 Symmetrical monopole HVDC transmission system	11
6.1.3 Bipolar HVDC transmission system	11
6.2 Key DC rating parameters	13
6.2.1 Nominal DC power	13
6.2.2 Nominal DC voltage	13
6.2.3 Nominal DC current	14
6.3 Converters	14
6.3.1 General	14
6.3.2 LCC	15
6.3.3 VSC	15
6.3.4 Comparisons between LCC and VSC	16
6.3.5 Applicable scenarios of LCC and VSC	19
6.3.6 Converter connection and combination in a project	19
6.3.7 Converter/interface transformer	20
6.4 Other main equipment	21
6.4.1 General	21
6.4.2 AC filtering equipment	21
6.4.3 Dynamic braking system	22
6.4.4 DC circuit breakers	22
6.5 Line conductor	22
6.6 Station sites and transmission line routes	23
6.6.1 HVDC converter station sites	23
6.6.2 Overhead line route	24
6.6.3 Electrode station sites	24
6.6.4 Submarine cable route	25
6.6.5 Land cable route	25
7 Interconnection system scheme and stability analysis	25
7.1 Scheme for HVDC access to AC system	25

7.2	Interface requirements between AC network and converter station	26
7.3	Requirements of HVDC control systems.....	27
7.3.1	LCC control.....	27
7.3.2	VSC control.....	27
7.4	Stability analysis.....	28
7.4.1	Static analysis	28
7.4.2	Transient analysis.....	31
7.4.3	Dynamic analysis.....	31
8	Economic comparison of the alternatives	33
8.1	General	33
8.2	Main factors to be considered	33
8.3	Indexes to be considered.....	33
8.4	Sensitivity analysis	34
8.5	Economic conclusion for recommended solution	34
9	Study conclusions and recommended solution	34
Annex A (informative) Introduction to three of the broadband oscillation analysis methods		35
A.1	Electromagnetic transient simulation method	35
A.2	Eigenvalue modelling method	35
A.3	impedance modelling method.....	36
Bibliography.....		37

INTERNATIONAL ELECTROTECHNICAL COMMISSION

Planning of HVDC systems

FOREWORD

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as "IEC Publication(s)"). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) IEC draws attention to the possibility that the implementation of this document may involve the use of (a) patent(s). IEC takes no position concerning the evidence, validity or applicability of any claimed patent rights in respect thereof. As of the date of publication of this document, IEC had not received notice of (a) patent(s), which may be required to implement this document. However, implementers are cautioned that this may not represent the latest information, which may be obtained from the patent database available at <https://patents.iec.ch>. IEC shall not be held responsible for identifying any or all such patent rights.

IEC TR 63179 has been prepared by IEC technical committee 115: High Voltage Direct Current (HVDC) transmission for DC voltages above 100 kV. It is a Technical Report.

The text of this Technical Report is based on the following documents:

Draft	Report on voting
115/418/DTR	115/427/RVDTR

Full information on the voting for its approval can be found in the report on voting indicated in the above table.

The language used for the development of this Technical Report is English.

This document was drafted in accordance with ISO/IEC Directives, Part 2, and developed in accordance with ISO/IEC Directives, Part 1 and ISO/IEC Directives, IEC Supplement, available at www.iec.ch/members_experts/refdocs. The main document types developed by IEC are described in greater detail at www.iec.ch/publications.

The committee has decided that the contents of this document will remain unchanged until the stability date indicated on the IEC website under webstore.iec.ch in the data related to the specific document. At this date, the document will be

- reconfirmed,
- withdrawn, or
- revised.
