### About the IEC

The International Electrotechnical Commission (IEC) is the leading global organization that prepares and publishes International Standards for all electrical, electronic and related technologies.

### About IEC publications

The technical content of IEC publications is kept under constant review by the IEC. Please make sure that you have the latest edition, a corrigendum or an amendment might have been published.

#### IEC publications search -

[webstore.iec.ch/advsearchform](http://webstore.iec.ch/advsearchform)

The advanced search enables to find IEC publications by a variety of criteria (reference number, text, technical committee, ...). It also gives information on projects, replaced and withdrawn publications.

#### IEC Just Published - [webstore.iec.ch/justpublished](http://webstore.iec.ch/justpublished)

Stay up to date on all new IEC publications. Just Published details all new publications released. Available online and once a month by email.

#### IEC Customer Service Centre - [webstore.iec.ch/csc](http://webstore.iec.ch/csc)

If you wish to give us your feedback on this publication or need further assistance, please contact the Customer Service Centre: [sales@iec.ch](mailto:sales@iec.ch).

#### IEC Products & Services Portal - [products.iec.ch](http://products.iec.ch)

Discover our powerful search engine and read freely all the publications previews, graphical symbols and the glossary. With a subscription you will always have access to up to date content tailored to your needs.

#### Electropedia - [www.electropedia.org](http://www.electropedia.org)

The world's leading online dictionary on electrotechnology, containing more than 22 500 terminological entries in English and French, with equivalent terms in 25 additional languages. Also known as the International Electrotechnical Vocabulary (IEV) online.

## CONTENTS

FOREWORD .....	5
INTRODUCTION .....	7
1 Scope .....	8
2 Normative references .....	8
3 Terms and definitions .....	8
4 Characteristics of electric island LVDC systems .....	8
4.1 General .....	8
4.2 Rural or remote areas without access to the grid .....	9
4.3 LVDC auxiliary power supply system for ships .....	10
5 Composition and technical description of electric island LVDC system .....	11
5.1 General .....	11
5.2 Voltage levels .....	12
5.2.1 General .....	12
5.2.2 Rural or remote areas without access to the grid .....	12
5.2.3 LVDC auxiliary power supply system in a ship .....	12
5.3 Topology .....	13
5.3.1 General .....	13
5.3.2 Household-level installation .....	13
5.3.3 County-level installation .....	14
5.3.4 LVDC auxiliary power supply systems for ship .....	16
5.4 Protection and operation .....	17
5.4.1 Earthing configuration .....	17
5.4.2 Protection .....	18
5.4.3 System operation and control .....	19
6 Application cases .....	21
6.1 Application case 1- A county-level electric island LVDC system in rural Africa .....	21
6.1.1 General .....	21
6.1.2 Structure and composition .....	21
6.1.3 Voltage level .....	24
6.1.4 Power quality .....	24
6.1.5 Control and protection configuration .....	26
6.2 Application case 2 - A household-level electric island LVDC system in rural China .....	27
6.2.1 General .....	27
6.2.2 Topology and composition .....	27
6.2.3 Voltage level .....	30
6.2.4 Power quality .....	30
6.2.5 Operation mode control and protection configuration .....	31
6.2.6 System earthing arrangement .....	31
6.3 Application case 3 - An electric island LVDC system situated in rural Algeria .....	31
6.3.1 General .....	31
6.3.2 Structure and composition .....	31
6.3.3 Voltage level .....	33
6.3.4 Power quality .....	34
6.3.5 Control and protection configuration .....	35

6.4	Application case 4 - Experimental test platforms .....	35
6.4.1	General.....	35
6.4.2	Structure and composition .....	35
6.4.3	Voltage level .....	36
6.4.4	Power quality.....	36
6.4.5	Control and protection configuration.....	39
6.5	Application Case 5 - LVDC powered ship .....	40
6.5.1	General.....	40
6.5.2	Structure and composition .....	40
6.5.3	Voltage level .....	41
6.5.4	Power quality.....	41
6.5.5	Control and Protection configuration .....	42
6.6	Application Case 6 - A solar powered electrical recreational ship in Indonesian waters.....	42
6.6.1	General.....	42
6.6.2	Structure and composition .....	42
6.6.3	Voltage level .....	45
6.6.4	Power quality.....	45
6.6.5	Control and protection configuration.....	45
Annex A (informative)	System composition.....	46
A.1	General .....	46
A.2	Power sources .....	46
A.2.1	General.....	46
A.2.2	Types of sources .....	46
A.2.3	Control modes.....	47
A.3	Loads .....	48
A.4	Storage system .....	48
A.5	Wiring system .....	50
A.6	DC breaker and fuses .....	51
A.7	Connectors and socket.....	52
A.8	Energy control and management system .....	52
Annex B (informative)	Design and configuration.....	54
Annex C (informative)	System installation .....	57
C.1	General .....	57
C.2	PV array mounting structures.....	57
C.3	Battery installations .....	57
C.4	Electrical cables and electrical connections.....	58
Bibliography.....		59
Figure 1 - Multi-tier matrix for measuring access to household electricity supply .....		10
Figure 2 - Guideline to select system voltage .....		12
Figure 3 - A household installation .....		14
Figure 4 - A single line diagram of radial configuration .....		15
Figure 5 - A single line diagram of ring configuration.....		16
Figure 6 - Radial configuration diagram of auxiliary power supply system of ship .....		17
Figure 7 - Ring configuration diagram of auxiliary power supply system of ship.....		17
Figure 8 - Control mode of passive DC systems.....		20

Figure 9 - Control mode of active DC systems .....	20

## INTERNATIONAL ELECTROTECHNICAL COMMISSION

**LVDC systems -  
Part 102: Low-voltage DC electric island power supply systems**

## FOREWORD

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as "IEC Publication(s)"). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) IEC draws attention to the possibility that the implementation of this document may involve the use of (a) patent(s). IEC takes no position concerning the evidence, validity or applicability of any claimed patent rights in respect thereof. As of the date of publication of this document, IEC had not received notice of (a) patent(s), which may be required to implement this document. However, implementers are cautioned that this may not represent the latest information, which may be obtained from the patent database available at <https://patents.iec.ch>. IEC shall not be held responsible for identifying any or all such patent rights.

IEC TR 63282-102 has been prepared by IEC technical committee 8: System aspects of electrical energy supply. It is a Technical Report.

The text of this Technical Report is based on the following documents:

Draft	Report on voting
8/1760/DTR	8/1784/RVDTR

Full information on the voting for its approval can be found in the report on voting indicated in the above table.

This document is to be used in conjunction with and as a supplement to IEC TR 63282 up to 1 500 V DC.

The language used for the development of this Technical Report is English.
