About the IEC

The International Electrotechnical Commission (IEC) is the leading global organization that prepares and publishes International Standards for all electrical, electronic and related technologies.

About IEC publications

The technical content of IEC publications is kept under constant review by the IEC. Please make sure that you have the latest edition, a corrigendum or an amendment might have been published.

IEC publications search -

webstore.iec.ch/advsearchform

The advanced search enables to find IEC publications by a variety of criteria (reference number, text, technical committee, ...). It also gives information on projects, replaced and withdrawn publications.

IEC Just Published - webstore.iec.ch/justpublished

Stay up to date on all new IEC publications. Just Published details all new publications released. Available online and once a month by email.

IEC Customer Service Centre - webstore.iec.ch/csc

If you wish to give us your feedback on this publication or need further assistance, please contact the Customer Service Centre: sales@iec.ch.

IEC Products & Services Portal - products.iec.ch

Discover our powerful search engine and read freely all the publications previews, graphical symbols and the glossary. With a subscription you will always have access to up to date content tailored to your needs.

Electropedia - www.electropedia.org

The world's leading online dictionary on electrotechnology, containing more than 22 500 terminological entries in English and French, with equivalent terms in 25 additional languages. Also known as the International Electrotechnical Vocabulary (IEV) online.

CONTENTS

FOREWORD.....	3
1 Scope.....	5
2 Normative references.....	5
3 Terms and definitions.....	5
4 Remote control and remote assistance system technologies	5
4.1 General information	5
4.2 Classification of remote control and remote assistance system.....	9
4.3 Components of remote control and remote assistance system	10
5 Interaction	12
5.1 General	12
5.2 Input	12
5.2.1 General.....	12
5.2.2 Sensor data.....	12
5.2.3 User's commands	12
5.2.4 Commands from objects in workplace	13
5.2.5 Information from objects in workplace	13
5.3 Processing.....	13
5.3.1 General.....	13
5.3.2 Local network communications	13
5.3.3 Search.....	13
5.3.4 Command generation	13
5.4 Output	14
5.4.1 General.....	14
5.4.2 Contents of edge device	14
5.4.3 Contents control of edge device	14
5.4.4 State, work of object in workplace	14
5.4.5 On-off control of system.....	14
6 Performance characteristics.....	14
6.1 General	14
6.2 Interaction performance.....	14
6.2.1 Interaction performance characteristics	14
6.2.2 Response time.....	14
6.2.3 Response accuracy and quality	14
6.2.4 Transition characteristics	15
6.3 Examples.....	15
6.3.1 Transmission of camera image from worker side to manager side	15
6.3.2 Work instruction by hand gesture.....	16
6.3.3 Followability as rotation or motion.....	19
6.3.4 Control of contents according to the sensor results.....	20
6.4 Electrical performance	20
6.5 Local or private network performance	21
6.5.1 General.....	21
6.5.2 Local or private network performance.....	21
6.5.3 Construction of local or private network.....	21
6.5.4 Response time evaluation of application performance for transmission.....	21

6.5.5	Evaluation performance of wireless communication in actual environment	21
6.6	Transmission performance.....	22
6.7	System reliability and durability.....	22
7	Specifications.....	23
Annex A (informative)	Possible standardization items.....	24
Bibliography.....		25
Figure 1	– Remote control and remote assistance system in a home and local area	6
Figure 2	–AR remote control and remote assistance system in home and local area.....	7
Figure 3	– VR remote control and remote assistance system in a home and local area	8
Figure 4	– Classification of remote control and remote assistance system	10
Figure 5	– Components of remote control and remote assistance system	11
Figure 6	– Example of interaction process.....	12
Figure 7	– Transmission of camera image from worker side to manager side	15
Figure 8	– Working instruction by hand gesture	17
Figure 9	– Comparison of task completion time.....	17
Figure 10	– Trackability against rotation	19
Figure 11	– AR image and object in reality before and after rotation	19
Figure 12	– Ambient image brightness adjustment according to brightness.....	20
Figure 13	– Example actual environment for performing a comparative evaluation by radio type in remote support system.....	21
Figure 14	– Example of the results of video quality (PLTE: 2 K, 6 Mbps, 30 FPS) in actual environment	22
Table 1	– Example of measurement results of delay time in camera movie transmission system	16

INTERNATIONAL ELECTROTECHNICAL COMMISSION

Remote control and remote assistance system in home and local area**FOREWORD**

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as "IEC Publication(s)"). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) IEC draws attention to the possibility that the implementation of this document may involve the use of (a) patent(s). IEC takes no position concerning the evidence, validity or applicability of any claimed patent rights in respect thereof. As of the date of publication of this document, IEC had not received notice of (a) patent(s), which may be required to implement this document. However, implementers are cautioned that this may not represent the latest information, which may be obtained from the patent database available at <https://patents.iec.ch>. IEC shall not be held responsible for identifying any or all such patent rights.

IEC TR 63511 has been prepared by subcommittee 18: Multimedia home systems and applications for end-user networks, of IEC technical committee 100: Audio, video and multimedia systems and equipment. It is a Technical Report.

The text of this Technical Report is based on the following documents:

Draft	Report on voting
100/4344/DTR	100/4376/RVDTR

Full information on the voting for its approval can be found in the report on voting indicated in the above table.

The language used for the development of this Technical Report is English.
