

TECHNICAL SPECIFICATION

**Selection and dimensioning of high-voltage insulators intended for use in
polluted conditions -
Part 3: Polymer insulators for AC systems**

About the IEC

The International Electrotechnical Commission (IEC) is the leading global organization that prepares and publishes International Standards for all electrical, electronic and related technologies.

About IEC publications

The technical content of IEC publications is kept under constant review by the IEC. Please make sure that you have the latest edition, a corrigendum or an amendment might have been published.

IEC publications search -

webstore.iec.ch/advsearchform

The advanced search enables to find IEC publications by a variety of criteria (reference number, text, technical committee, ...). It also gives information on projects, replaced and withdrawn publications.

IEC Just Published - webstore.iec.ch/justpublished

Stay up to date on all new IEC publications. Just Published details all new publications released. Available online and once a month by email.

IEC Customer Service Centre - webstore.iec.ch/csc

If you wish to give us your feedback on this publication or need further assistance, please contact the Customer Service Centre: sales@iec.ch.

IEC Products & Services Portal - products.iec.ch

Discover our powerful search engine and read freely all the publications previews, graphical symbols and the glossary. With a subscription you will always have access to up to date content tailored to your needs.

Electropedia - www.electropedia.org

The world's leading online dictionary on electrotechnology, containing more than 22 500 terminological entries in English and French, with equivalent terms in 25 additional languages. Also known as the International Electrotechnical Vocabulary (IEV) online.

CONTENTS

FOREWORD.....	3
1 Scope.....	5
2 Normative references.....	5
3 Terms, definitions and abbreviated terms.....	5
3.1 Terms and definitions.....	5
3.2 Abbreviated terms.....	7
4 Principles.....	7
5 Materials.....	8
5.1 General information on common polymer housing materials.....	8
5.2 Issues specific to polymer housing materials under pollution.....	9
5.2.1 Reduction of creepage distance.....	9
5.2.2 Extreme pollution.....	9
6 Site pollution severity class.....	10
7 Determination of the RUSCD.....	10
8 General recommendations for polymer profiles.....	11
9 Checking of profile parameters.....	12
9.1 General remark.....	12
9.2 Alternating sheds and shed overhang.....	12
9.3 Spacing versus shed overhang.....	13
9.4 Minimum distance between sheds.....	14
9.5 Creepage distance versus clearance.....	15
9.6 Shed angle.....	15
9.7 Creepage factor.....	16
10 Determining USCD by correcting RUSCD.....	16
10.1 Introductory remark.....	16
10.2 Correction for altitude K_a	17
10.3 Correction for insulator diameter K_d	17
10.4 Correction for profile K_s	18
10.5 Correction for the number of similar insulators in parallel K_p	18
11 Determination of the final minimum creepage distance.....	19
12 Confirmation by testing.....	19
Annex A (informative) Background information on pollution induced degradation of polymers.....	20
Bibliography.....	23
Figure 1 – RUSCD as a function of SPS class.....	10
Figure 2 – Typical “open” profile.....	11
Figure 3 – Typical steep polymer profile.....	11
Figure 4 – Typical shallow under-ribs on open profile.....	11
Figure 5 – Typical deep under-rib profile.....	12
Figure 6 – Typical “alternating” profiles.....	12
Figure 7 – Illustration and typical values of shed overhang.....	12
Figure 8 – Spacing versus shed overhang for uniform and alternating sheds.....	13

Figure 9 – Minimum distance between adjacent sheds of the same diameter for uniform and alternating sheds.....	14
Figure 10 – Creepage distance versus clearance for different sheds.....	15
Figure 11 – Illustrations of shed angle	15
Figure 12 – Correction for insulator diameter.....	18
Figure A.1 – Operating areas as a function of pollution severity and USCD (for a fixed insulating length).....	22
Table 1 – Classification of profiles based on the values of shed overhang.....	13
Table 2 – Deviations for s/p for sheds with and without under-ribs with trunk diameter ≤ 110 mm	13
Table 3 – Deviations for s/p for sheds with and without under-ribs with trunk diameter > 110 mm	13
Table 4 – Deviations for c for uniform and alternating sheds	14
Table 5 – Deviations for l/d for different sheds.....	15
Table 6 – Deviations for shed angle	16
Table 7 – Deviations for creepage factor.....	16
