About the IEC

The International Electrotechnical Commission (IEC) is the leading global organization that prepares and publishes International Standards for all electrical, electronic and related technologies.

About IEC publications

The technical content of IEC publications is kept under constant review by the IEC. Please make sure that you have the latest edition, a corrigendum or an amendment might have been published.

IEC publications search -

webstore.iec.ch/advsearchform

The advanced search enables to find IEC publications by a variety of criteria (reference number, text, technical committee, ...). It also gives information on projects, replaced and withdrawn publications.

IEC Just Published - webstore.iec.ch/justpublished

Stay up to date on all new IEC publications. Just Published details all new publications released. Available online and once a month by email.

IEC Customer Service Centre - webstore.iec.ch/csc

If you wish to give us your feedback on this publication or need further assistance, please contact the Customer Service Centre: sales@iec.ch.

IEC Products & Services Portal - products.iec.ch

Discover our powerful search engine and read freely all the publications previews, graphical symbols and the glossary. With a subscription you will always have access to up to date content tailored to your needs.

Electropedia - www.electropedia.org

The world's leading online dictionary on electrotechnology, containing more than 22 500 terminological entries in English and French, with equivalent terms in 25 additional languages. Also known as the International Electrotechnical Vocabulary (IEV) online.

CONTENTS

FOREWORD	3
INTRODUCTION	5
1 Scope	6
2 Normative references	6
3 Terms and definitions	6
4 Purpose of the test	8
5 Test boundary and test elections	8
6 Schedule	9
7 Measurement equipment	9
7.1 General	9
7.2 Irradiance measurement	10
7.3 PV cell temperature	11
7.4 Electrical power	12
8 Soiling	12
9 Trackers	13
10 Performance model	13
10.1 Overview	13
10.2 Performance model option 1	14
10.3 Performance model option 2	15
10.4 Performance model option 3	16
11 Partial shading	17
12 Plant design modifications	17
13 Multiple plant sections	18
14 Filtering data	19
14.1 Purpose	19
14.2 General requirements	19
14.2.1 Documentation	19
14.2.2 Synchronization	19
14.2.3 Manner of excluding data	19
14.2.4 Consistency	19
14.2.5 Multiple sensors	19
14.3 Test limits	19
14.3.1 POA irradiance	19
14.3.2 Inverter utilization	20
14.3.3 Partial shading	20
14.3.4 Angle of incidence	20
14.4 Invalid readings	20
14.4.1 Data out of range of reasonable physical limits	20
14.4.2 Stuck values	20
14.4.3 Missing data	21
14.5 Operational issues	21
14.5.1 Equipment not functioning	21
14.5.2 Trackers not tracking	21
14.6 Unstable irradiance	21
14.7 Non-linear or non-uniform conditions	21

15	Procedure.....	22
15.1	Determine and document test elections.....	22
15.2	Acquire measured data	22
15.3	Filter the data	22
15.4	Determine coefficients of the performance equation, if used	22
15.5	Calculate expected power	22
15.6	Calculate power performance index (PPI)	22
16	Test report.....	23
Annex A (informative) Template for documenting test elections		24
Bibliography.....		26

INTERNATIONAL ELECTROTECHNICAL COMMISSION

**Photovoltaic system performance -
Part 2: Power performance index and capacity evaluation method**

FOREWORD

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as "IEC Publication(s)"). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) IEC draws attention to the possibility that the implementation of this document may involve the use of (a) patent(s). IEC takes no position concerning the evidence, validity or applicability of any claimed patent rights in respect thereof. As of the date of publication of this document, IEC had not received notice of (a) patent(s), which may be required to implement this document. However, implementers are cautioned that this may not represent the latest information, which may be obtained from the patent database available at <https://patents.iec.ch>. IEC shall not be held responsible for identifying any or all such patent rights.

IEC TS 61724-2 has been prepared by IEC technical committee 82: Solar photovoltaic energy systems. It is a Technical Specification.

This second edition cancels and replaces the first edition published in 2016. This edition constitutes a technical revision.

This edition includes the following significant technical changes with respect to the previous edition:

- a) Adapting the document for bifacial PV systems, in accordance with the latest edition of IEC 61724-1 and current industry practices.
- b) Adapting the test procedure to account for the limited times of unconstrained system operation which are now common because of high DC-to-AC ratios (clipping) and interconnection limits (curtailment).
- c) Adapting the test procedure to achieve a test that can be performed in a short time of three to five days during favorable conditions.
