About the IEC

The International Electrotechnical Commission (IEC) is the leading global organization that prepares and publishes International Standards for all electrical, electronic and related technologies.

About IEC publications

The technical content of IEC publications is kept under constant review by the IEC. Please make sure that you have the latest edition, a corrigendum or an amendment might have been published.

IEC publications search -

webstore.iec.ch/advsearchform

The advanced search enables to find IEC publications by a variety of criteria (reference number, text, technical committee, ...). It also gives information on projects, replaced and withdrawn publications.

IEC Just Published - webstore.iec.ch/justpublished

Stay up to date on all new IEC publications. Just Published details all new publications released. Available online and once a month by email.

IEC Customer Service Centre - webstore.iec.ch/csc

If you wish to give us your feedback on this publication or need further assistance, please contact the Customer Service Centre: sales@iec.ch.

IEC Products & Services Portal - products.iec.ch

Discover our powerful search engine and read freely all the publications previews, graphical symbols and the glossary. With a subscription you will always have access to up to date content tailored to your needs.

Electropedia - www.electropedia.org

The world's leading online dictionary on electrotechnology, containing more than 22 500 terminological entries in English and French, with equivalent terms in 25 additional languages. Also known as the International Electrotechnical Vocabulary (IEV) online.

CONTENTS

FOREWORD.....	3
INTRODUCTION.....	5
1 Scope.....	6
1.1 General.....	6
1.2 Published versions of the standard and related namespace names.....	6
1.3 Identification of the namespace	6
1.4 Code component distribution	6
2 Normative references	7
3 Terms, definitions and abbreviated terms	7
3.1 Terms and definitions	7
3.2 Abbreviated terms	7
4 Use of OCL (machine processable rules) in the specification and engineering process	8
5 Use cases	9
5.1 Validate SCL files at every stage of the specification and engineering process.....	9
5.1.1 Description of the use case	9
5.1.2 Narrative of use case	9
5.1.3 General remarks	9
5.1.4 Diagrams of use case.....	11
5.1.5 Technical details – Actors: people, systems, applications, databases, the power system, and other stakeholders	13
5.1.6 Information exchanged.....	13
5.2 Verify the conformity of an SCL file after completion of the upgrading / downgrading rules.....	13
5.2.1 Description of the use case	13
5.2.2 Narrative of use case	14
5.2.3 Diagrams of use case.....	14
5.2.4 Technical details – Actors: people, systems, applications, databases, the power system, and other stakeholders	15
5.3 Extend standard OCL rules with private OCL rules	16
5.3.1 Description of the use case	16
5.3.2 Narrative of use case	16
5.3.3 General remarks	16
5.3.4 Diagrams of use case.....	17
5.3.5 Technical details	18
5.3.6 Information exchanged	19
6 OCL: Object Constraint language.....	19
6.1 What is OCL and how it is used for IEC 61850	19
6.2 General principles of OCL	20
6.3 OCL types.....	20
6.3.1 Simple types	20
6.3.2 Collections.....	20
6.4 Implementation of OCL specification.....	21
7 UML model of SCL.....	21
8 Framework for editing OCL rules within IEC 61850	23
8.1 OCL rule identifier	23

8.2	OCL rule documentation template.....	24
8.3	Structure of the error messages	24
8.4	Severity levels	25
8.5	Lifecycle of the rules	25
Annex A (informative)	OCL rules Examples	27
Annex B (informative)	Examples of private rules	31
Annex C (informative)	Example of OpenSource implementation: RiseClipse	32
Figure 1 – Information flow in the configuration process, including SCL File validator tool.....		8
Figure 2 – OCL simple types and operations		20
Figure 3 – OCL operations on collections		20
Figure 4 – Example of UML model for DataTypeTemplate section		21
Figure 5 – Example of added relation between <i>tDOType</i> and <i>tAbstractDataObject</i>		22
Figure 6 – Illustration of an extension of SCL: IEC TR 61850-80-5		23
Figure C.1 – Use of RiseClipse for DataTypeTemplates section		32
Table 1 – Attributes of the IEC 61850-6-3 OCL namespace		6

INTERNATIONAL ELECTROTECHNICAL COMMISSION

**Communication networks and systems for power utility automation -
Part 6-3: Format of machine-processable rules for
validation of IEC 61850 XML-based files**

FOREWORD

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as "IEC Publication(s)"). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) IEC draws attention to the possibility that the implementation of this document may involve the use of (a) patent(s). IEC takes no position concerning the evidence, validity or applicability of any claimed patent rights in respect thereof. As of the date of publication of this document, IEC had not received notice of (a) patent(s), which may be required to implement this document. However, implementers are cautioned that this may not represent the latest information, which may be obtained from the patent database available at <https://patents.iec.ch>. IEC shall not be held responsible for identifying any or all such patent rights.

IEC TS 61850-6-3 has been prepared by IEC technical committee TC 57: Power systems management and associated information exchange. It is a Technical Specification.

The text of this Technical Specification is based on the following documents:

Draft	Report on voting
57/2765/DTS	57/2795/RVDTS

Full information on the voting for its approval can be found in the report on voting indicated in the above table.

The language used for the development of this Technical Specification is English.
