About the IEC

The International Electrotechnical Commission (IEC) is the leading global organization that prepares and publishes International Standards for all electrical, electronic and related technologies.

About IEC publications

The technical content of IEC publications is kept under constant review by the IEC. Please make sure that you have the latest edition, a corrigendum or an amendment might have been published.

IEC publications search -

webstore.iec.ch/advsearchform

The advanced search enables to find IEC publications by a variety of criteria (reference number, text, technical committee, ...). It also gives information on projects, replaced and withdrawn publications.

IEC Just Published - webstore.iec.ch/justpublished

Stay up to date on all new IEC publications. Just Published details all new publications released. Available online and once a month by email.

IEC Customer Service Centre - webstore.iec.ch/csc

If you wish to give us your feedback on this publication or need further assistance, please contact the Customer Service Centre: sales@iec.ch.

IEC Products & Services Portal - products.iec.ch

Discover our powerful search engine and read freely all the publications previews, graphical symbols and the glossary. With a subscription you will always have access to up to date content tailored to your needs.

Electropedia - www.electropedia.org

The world's leading online dictionary on electrotechnology, containing more than 22 500 terminological entries in English and French, with equivalent terms in 25 additional languages. Also known as the International Electrotechnical Vocabulary (IEV) online.

CONTENTS

FOREWORD	4
INTRODUCTION	6
1 Scope	7
2 Normative references	8
3 Terms and definitions	9
3.1 Electric supply equipment	9
3.2 Functions	10
3.3 Defined areas and spaces	10
3.4 Service and usage	11
4 System overview	11
4.1 General architecture	11
4.2 Coordinate systems	14
4.2.1 Overview	14
4.2.2 Reference coordinate system	14
4.2.3 Vehicle connector coordinate system	14
4.2.4 Vehicle inlet coordinate system	14
4.2.5 EV plug coordinate system	14
4.2.6 Coordinate system of vehicle	15
4.3 Home space	15
4.4 Typical docking and undocking process	15
5 Classification	16
6 Service conditions	18
7 Protection against electric shock	18
7.1 General	18
7.2 EV supply equipment with socket-outlet with accessible power contacts	18
7.2.1 General	18
7.2.2 Energization of power contacts	18
7.2.3 De-energization of accessible power contacts	18
7.2.4 Switching device monitoring	19
7.2.5 Self-test	19
7.2.6 Protective conductor resistance check	19
7.2.7 Insulation check	19
7.2.8 Separation between accessible power contacts and hazardous-live-parts	20
7.2.9 Touch voltage and accessible energy after unmating	21
7.2.10 Short-circuit current	21
8 Protection against thermal incident	22
9 Protection against mechanically caused injury	22
9.1 General	22
9.2 Height and ramp angles	23
9.3 Limitation of force and pressure	23
9.4 Maximum velocity and energy	23
9.5 Warning of manipulator movement	24
9.6 Emergency stop (optional)	24
10 Constructional requirements	24
10.1 Dimensions	24

10.2	IP degree.....	24
10.3	Cable	25
10.4	Vehicle drive-over.....	25
10.5	Resilience to movements of the vehicle.....	25
10.6	Limitation of force and torque onto the vehicle.....	26
10.7	Prevention of unnecessary movement of accessible moving parts outside of the home space.....	26
10.8	Indication that manipulator is within home space.....	26
10.9	Automatic undocking.....	26
10.10	Manual undocking.....	26
10.11	Accessibility.....	26
11	Marking and instructions.....	27
11.1	General	27
11.2	Marking	27
11.3	User manual.....	27
11.4	Installation manual.....	27
12	Measurement and test methods	28
12.1	General	28
12.2	Interoperability test.....	28
12.3	Vehicle drive-over test.....	28
Annex A (informative)	Examples of topologies of charging sites with aEVSE.....	30
A.1	General	30
A.2	Examples.....	30
Annex B (informative)	Manually triggered operation of automatic docking and undocking function.....	33
B.1	General	33
B.2	User interface	34
B.3	Indication/user feedback.....	34
B.4	User manual/installation instructions.....	35
Annex C (informative)	Interoperability test for aEVSE.....	36
C.1	Principle	36
C.2	Test bench.....	36
C.3	Preparation of DUT	37
C.4	Procedure.....	37
C.5	Expression of results.....	39
C.6	Test report.....	39
Annex D (informative)	Alphabetically sorted list of terms.....	40
Bibliography		41
Figure 1	– Example of a block diagram of a vehicle according to ISO TS 5474-5 with an aEVSE, with the manipulator and vehicle connector attached to the aEVSE.....	12
Figure 2	– Example of a block diagram of a vehicle according to ISO TS 5474-5 with an aEVSE, with the manipulator and plug attached to the EV.....	13
Figure 3	– Coordinate systems for aEVSE.....	14
Figure 4	– Activity diagram of typical docking and undocking process	16
Figure 5	– Surface mounted	17
Figure 6	– Flush mounted.....	17

Figure 7 – Example of switching devices in series providing full-disconnection for unmated power contacts according to option a)	20
Figure 8 – Switching devices in series providing monitoring of full-disconnection according to option b)	21
Figure 9 – Mating space.....	25
Figure A.1 – Example of topology with flush-mounted aEVSE with attached manipulator.....	31
Figure A.2 – Example of topology with flush-mounted aEVSE with manipulator attached to the vehicle	32
Figure B.1 – Typical activity diagram of manually triggered docking and undocking process without communication	34
Figure C.1 – Example of a mating space (dashed lines) in a reference coordinate system	38
Figure C.2 – Example of typical vehicle movement during boarding and alighting of a passenger	38
Table C.1 – Example of parameters of a mating space	37
Table D.1 – Alphabetically sorted list of terms	40

INTERNATIONAL ELECTROTECHNICAL COMMISSION

**Electric vehicle conductive charging system -
Part 26: EV supply equipment with automatic docking of a vehicle
coupler located at the underbody of an electric vehicle**

FOREWORD

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as "IEC Publication(s)"). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) IEC draws attention to the possibility that the implementation of this document may involve the use of (a) patent(s). IEC takes no position concerning the evidence, validity or applicability of any claimed patent rights in respect thereof. As of the date of publication of this document, IEC had not received notice of (a) patent(s), which may be required to implement this document. However, implementers are cautioned that this may not represent the latest information, which may be obtained from the patent database available at <https://patents.iec.ch>. IEC shall not be held responsible for identifying any or all such patent rights.

IEC TS 61851-26 has been prepared by IEC technical committee 69: Electrical power/energy transfer systems for electrically propelled road vehicles and industrial trucks. It is a Technical Specification.

The text of this Technical Specification is based on the following documents:

Draft	Report on voting
69/1108/DTS	69/1125/RVDTS

Full information on the voting for its approval can be found in the report on voting indicated in the above table.

The language used for the development of this Technical Specification is English.
