About the IEC

The International Electrotechnical Commission (IEC) is the leading global organization that prepares and publishes International Standards for all electrical, electronic and related technologies.

About IEC publications

The technical content of IEC publications is kept under constant review by the IEC. Please make sure that you have the latest edition, a corrigendum or an amendment might have been published.

IEC publications search -

webstore.iec.ch/advsearchform

The advanced search enables to find IEC publications by a variety of criteria (reference number, text, technical committee, ...). It also gives information on projects, replaced and withdrawn publications.

IEC Just Published - webstore.iec.ch/justpublished

Stay up to date on all new IEC publications. Just Published details all new publications released. Available online and once a month by email.

IEC Customer Service Centre - webstore.iec.ch/csc

If you wish to give us your feedback on this publication or need further assistance, please contact the Customer Service Centre: sales@iec.ch.

IEC Products & Services Portal - products.iec.ch

Discover our powerful search engine and read freely all the publications previews, graphical symbols and the glossary. With a subscription you will always have access to up to date content tailored to your needs.

Electropedia - www.electropedia.org

The world's leading online dictionary on electrotechnology, containing more than 22 500 terminological entries in English and French, with equivalent terms in 25 additional languages. Also known as the International Electrotechnical Vocabulary (IEV) online.

CONTENTS

FOREWORD	3
INTRODUCTION	5
1 Scope	6
2 Normative references	6
3 Terms, definitions and abbreviations	6
3.1 Terms and definitions	6
3.2 Abbreviations	7
4 Overview	7
5 System architecture and inverter selection	7
6 General considerations	8
6.1 Overview	8
6.2 IP rating	8
6.3 Ambient temperature	8
6.4 Altitude	8
6.5 Direct sunlight	9
6.6 Efficiency	9
6.7 No-load and stand-by power requirements	9
6.8 Ventilation requirements	9
6.9 Earthing arrangements	9
6.10 Waveform quality	9
6.11 Compatibility with loads that produce significant harmonics	9
6.12 Electromagnetic interference	9
6.13 Load growth	9
6.14 Protection	10
7 Variable frequency drives and T1I-c systems – REN systems operating with no storage, DC source to AC application	10
7.1 General	10
7.2 Characteristics of the inverter	11
7.2.1 Frequency control	11
7.2.2 Maximum power point tracking	11
7.3 Sizing of the inverter	11
7.3.1 General	11
7.3.2 AC voltage	11
7.3.3 AC current	11
7.3.4 DC voltage	11
7.3.5 DC current	11
7.4 Variable frequency drive standards	12
7.5 Variations on the architecture	12
8 Uni-directional grid forming inverters that work with batteries – Type T2I systems – REN production with energy storage	12
8.1 General	12
8.2 Characteristics of the inverter	13
8.2.1 Grid forming	13
8.3 Sizing of the inverter	14
8.3.1 Input DC voltage	14
8.3.2 Input DC current	14

8.3.3	AC current and power.....	14
8.3.4	AC voltage	14
8.3.5	Power factor handling range.....	14
8.4	Variations on the architecture	15
9	Uni-directional inverters that synchronize to the grid – Type T3I systems – REN and diesel production without energy storage	15
9.1	General	15
9.2	Characteristics of the inverter	16
9.2.1	General.....	16
9.2.2	Grid following	16
9.2.3	Maximum power point tracking	16
9.2.4	Active power control.....	17
9.2.5	Grid support	17
9.3	Sizing of the inverter	17
9.3.1	Input DC voltage.....	17
9.3.2	Input DC current	17
9.3.3	Output AC current and power	17
9.4	Variations on the architecture	18
10	Bi-directional grid forming inverters that work with batteries – Type T4I systems, RE and diesel with energy storage	18
10.1	General	18
10.2	Characteristics of the inverter	19
10.2.1	Grid forming	19
10.2.2	Battery management	19
10.2.3	Frequency modulation	19
10.2.4	Master-slave.....	20
10.2.5	Reactive power control	20
10.3	Sizing the inverter.....	20
10.3.1	General.....	20
10.3.2	Input DC voltage.....	20
10.3.3	Input DC current	20
10.3.4	Output AC voltage.....	20
10.3.5	Output AC current.....	21
10.4	Variations on the architecture	21

Figure 1 – Type T1I-c system – DC to AC with no batteries..... 10

Figure 2 – Type T2I system – DC to AC with batteries..... 13

Figure 3 – Type T3I system – DC to AC with diesel but no batteries 16

Figure 4 – Type T4I system – DC to AC with diesel and batteries 19

Table 1 – Types of inverter and system architecture it is applicable to 8
