About the IEC
The International Electrotechnical Commission (IEC) is the leading global organization that prepares and publishes International Standards for all electrical, electronic and related technologies.

About IEC publications
The technical content of IEC publications is kept under constant review by the IEC. Please make sure that you have the latest edition, a corrigendum or an amendment might have been published.

IEC publications search - webstore.iec.ch/advsearchform
The advanced search enables to find IEC publications by a variety of criteria (reference number, text, technical committee, …). It also gives information on projects, replaced and withdrawn publications.

IEC Just Published - webstore.iec.ch/justpublished
Stay up to date on all new IEC publications. Just Published details all new publications released. Available online and once a month by email.

IEC Customer Service Centre - webstore.iec.ch/csc
If you wish to give us your feedback on this publication or need further assistance, please contact the Customer Service Centre: sales@iec.ch.

IEC Products & Services Portal - products.iec.ch
Discover our powerful search engine and read freely all the publications previews, graphical symbols and the glossary. With a subscription you will always have access to up to date content tailored to your needs.

Electropedia - www.electropedia.org
The world's leading online dictionary on electrotechnology, containing more than 22 500 terminological entries in English and French, with equivalent terms in 25 additional languages. Also known as the International Electrotechnical Vocabulary (IEV) online.

CONTENTS

FOREWORD 11
INTRODUCTION to IEC TS 62271-5:2024 13
INTRODUCTION to IEC TS 62271-313:2025 13
1 Scope 14
2 Normative references 14
3 Terms and definitions 17
3.1 General terms and definitions 17
3.2 Assemblies of switchgear and controlgear 23
3.3 Parts of assemblies 23
3.4 Switching devices 23
3.5 Parts of switchgear and controlgear 29
3.6 Operational characteristics of switchgear and controlgear 36
3.7 Characteristic quantities 42
3.8 Index of definitions 48
4 Normal and special service conditions 53
4.1 Normal service conditions 53
4.1.1 General 53
4.1.2 Indoor switchgear and controlgear 53
4.1.3 Outdoor switchgear and controlgear 53
4.2 Special service conditions 54
4.2.1 General 54
4.2.2 Altitude 54
4.2.3 Exposure to pollution 54
4.2.4 Temperature and humidity 55
4.2.5 Exposure to abnormal vibrations, shock or tilting 55
4.2.6 Wind speed 55
4.2.7 Other parameters 55
5 Ratings 55
5.1 General 55
5.2 Rated direct voltage (U_{rd}) 56
5.2.1 General 56
5.2.2 Rated voltages 56
5.3 Rated insulation level (U_{dd}, U_p, U_s) 57
5.4 Rated continuous current (I_{rd}) 60
5.5 Rated values of short-time withstand current 60
5.5.1 Typical waveform of short-circuit current 60
5.5.2 Rated short-time withstand direct current (I_{kd}) 63
5.5.3 Rated peak withstand current (I_{pd}) 63
5.5.4 Rated duration of short-circuit (t_{kd}) 63
5.6 Rated supply voltage of auxiliary and control circuits (U_a) 63
5.6.1 General 63
5.6.2 Rated supply voltage (U_a) 64
5.7 Rated supply frequency of auxiliary and control circuits 64
5.101 Rated operating sequence 65

5.102 Rated short-circuit breaking current (I_{scd}) 65
5.103 Rated short-circuit making current 65
5.104 Rated dissipated energy during breaking operation 65
6 Design and construction 65
6.1 Requirements for liquids in switchgear and controlgear 65
6.2 Requirements for gases in switchgear and controlgear 66
6.3 Earthing of switchgear and controlgear 66
6.4 Auxiliary and control equipment and circuits 66
6.4.1 General 66
6.4.2 Protection against electric shock 67
6.4.3 Components installed in enclosures 67
6.5 Dependent power operation 70
6.6 Stored energy operation 70
6.6.1 General 70
6.6.2 Energy storage in gas receivers or hydraulic accumulators 71
6.6.3 Energy storage in springs (or weights) 71
6.6.4 Manual charging 71
6.6.5 Motor charging 71
6.6.6 Energy storage in capacitors 71
6.7 Independent unlatched operation (independent manual or power operation) 71
6.8 Manually operated actuators 72
6.9 Operation of releases 72
6.9.1 General 72
6.9.2 Shunt closing release 72
6.9.3 Shunt opening release 72
6.9.4 Capacitor operation of shunt releases 72
6.9.5 Under-voltage release 73
6.10 Pressure/level indication 73
6.10.1 Gas pressure 73
6.10.2 Liquid level 73
6.11 Nameplates 73
6.11.1 General 74
6.11.2 Application 74
6.12 Locking devices 76
6.13 Position indication 77
6.14 Degrees of protection provided by enclosures 77
6.14.1 General 77
6.14.2 Protection of persons against access to hazardous parts and protection of the equipment against ingress of solid foreign objects (IP coding) 77
6.14.3 Protection against ingress of water (IP coding) 77
6.14.4 Protection against mechanical impact under normal service conditions (IK coding) 78
6.15 Creepage distances for outdoor insulators 78
6.16 Gas and vacuum tightness 78
6.16.1 General 78
6.16.2 Controlled pressure systems for gas 78
6.16.3 Closed pressure systems for gas 78
6.16.4 Sealed pressure systems 79
6.17 Tightness for liquid systems 79

6.17.1 General 79
6.17.2 Leakage rates 79
6.18 Fire hazard (flammability) 79
6.19 Electromagnetic compatibility (EMC) 80
6.20 X-ray emission 80
6.21 Corrosion 80
6.22 Filling levels for insulation, switching and/or operation 80
6.101 Static mechanical load 80
6.102 Metal oxide surge arrester (MOSA) 80
6.103 Power to potential device (if applicable) 80
6.104 Liquid cooling system (if applicable) 81
6.105 Power electronic devices (if applicable) 81
6.106 Other components (if applicable) 81
7 Type tests 81
7.1 General 81
7.1.1 Basics 81
7.1.2 Information for identification of test objects 82
7.1.3 Information to be included in type-test reports 83
7.1.4 Invalid tests 83
7.2 Dielectric tests 84
7.2.1 General 84
7.2.2 Ambient air conditions during tests 84
7.2.3 Wet test procedure 84
7.2.4 Arrangement of the equipment 84
7.2.5 Criteria to pass the test 85
7.2.6 Application of the test voltage and test conditions 86
7.2.7 Tests of switchgear and controlgear 88
7.2.8 Artificial pollution tests for outdoor insulators 90
7.2.9 Partial discharge tests 90
7.2.10 Dielectric tests on auxiliary and control circuits 90
7.2.11 Voltage test as condition check 90
7.3 Resistance measurement 91
7.3.1 Measurement of the resistance of auxiliary contacts class 1 and class 2 91
7.3.2 Measurement of the resistance of auxiliary contacts class 3 91
7.3.3 Electrical continuity of earthed metallic parts test 91
7.3.4 Resistance measurement of contacts and connections in the main circuit as a condition check 91
7.4 Continuous current tests 92
7.4.1 Condition of the test object 92
7.4.2 Arrangement of the equipment 93
7.4.3 Test current and duration 93
7.4.4 Temperature measurement during test 94
7.4.5 Resistance of the main circuit 95
7.4.6 Criteria to pass test 95
7.5 Short-time withstand current and peak withstand current tests 99
7.5.1 General 99
7.5.2 Arrangement of the equipment and of the test circuit 99
7.5.3 Test current and duration 100
7.5.4 Conditions of the test object after test 101

7.6 Verification of the protection 101
7.6.1 Verification of the IP coding 101
7.6.2 Verification of the IK coding 101
7.7 Tightness tests 102
7.7.1 General 102
7.7.2 Controlled pressure systems for gas 103
7.7.3 Closed pressure systems for gas 103
7.7.4 Sealed pressure systems 104
7.7.5 Liquid tightness tests 104
7.8 Electromagnetic compatibility tests (EMC) 104
7.8.1 Emission tests 105
7.8.2 Immunity tests on auxiliary and control circuits 107
7.8.3 Additional EMC tests on auxiliary and control circuits 110
7.9 Additional tests on auxiliary and control circuits 110
7.9.1 General 111
7.9.2 Functional tests 111
7.9.3 Verification of the operational characteristics of auxiliary contacts 111
7.9.4 Environmental tests 112
7.9.5 Dielectric test 113
7.10 X-radiation test for vacuum interrupters 113
7.10.1 General requirements 113
7.10.2 Test voltage and measurement procedure 115
7.10.3 Acceptance criteria 115
7.101 Mechanical and environmental test 116
7.101.1 Miscellaneous provisions for mechanical and environmental tests 116
7.101.2 Mechanical operation test at ambient air temperature 118
7.101.3 Low and high-temperature test 120
7.102 Short-circuit making and breaking tests 121
7.102.1 General 121
7.102.2 Making tests 122
7.102.3 Breaking tests 122
7.102.4 Unit testing 124
7.102.5 Multi-part testing 127
7.103 Seismic qualification tests 128
7.104 Communication conformance tests 128
7.105 Cooling equipment tests 128
8 Routine tests 128
8.1 General 128
8.2 Dielectric test on the main circuit 128
8.3 Tests on auxiliary and control circuits 128
8.3.1 Inspection of auxiliary and control circuits, and verification of conformity to the circuit diagrams and wiring diagrams 128
8.3.2 Functional tests 129
8.3.3 Verification of protection against electrical shock 129
8.3.4 Dielectric tests 129
8.4 Measurement of the resistance of the main circuit 129
8.5 Tightness test 130
8.5.1 General 130
8.5.2 Controlled pressure systems for gas 130

8.5.3 Closed pressure systems for gas 130
8.5.4 Sealed pressure systems 130
8.5.5 Liquid tightness tests 130
8.6 Design and visual checks 131
8.101 Connection inspection 131
8.102 Voltage-grading circuit inspection 131
8.103 Voltage withstand test 131
8.104 Mechanical operating tests 131
8.105 MOSA current distribution test 131
8.106 Verification of other components 131
9 Guide to the selection of switchgear and controlgear (informative) 132
9.1 General 132
9.2 Selection of rated values 132
9.2.101 Selection of the rated direct voltage 132
9.2.102 Insulation coordination 132
9.2.103 Selection of the rated continuous current 133
9.2.104 Local service conditions 133
9.2.105 Selection of the rated short-circuit breaking current 133
9.2.106 Operating sequence in service 133
9.3 Cable-interface considerations 133
9.4 Continuous or temporary overload due to changed service conditions 133
9.5 Environmental aspects 133
9.5.1 Service conditions 133
9.5.2 Clearances affected by service conditions 133
9.5.3 High humidity 134
9.5.4 Solar radiation 134
10 Information to be given with enquiries, tenders and orders (informative) 134
10.1 General 134
10.2 Information with enquiries and orders 134
10.3 Information with tenders 136
11 Transport, storage, installation, operating instructions and maintenance 138
11.1 General 138
11.2 Conditions during transport, storage and installation 138
11.3 Installation 139
11.3.1 General 139
11.3.2 Unpacking and lifting 139
11.3.3 Assembly 139
11.3.4 Mounting 139
11.3.5 Connections 139
11.3.6 Information about gas and gas mixtures for controlled and closed pressure systems 140
11.3.7 Final installation inspection 140
11.3.8 Basic input data by the user 140
11.3.9 Basic input data by the manufacturer 141
11.4 Operating instructions 141
11.5 Maintenance 141
11.5.1 General 141
11.5.2 Information about fluids and gas to be included in maintenance manual 141
11.5.3 Recommendations for the manufacturer 142

11.5.4 Recommendations for the user 143
11.5.5 Failure report 144
12 Safety 145
12.1 General 145
12.2 Precautions by manufacturers 146
12.3 Precautions by users 146
12.101 High energy capacitor 147
12.102 High-voltage switchgear 147

INTERNATIONAL ELECTROTECHNICAL COMMISSION

_____

HIGH-VOLTAGE SWITCHGEAR AND CONTROLGEAR –

Part 313: Direct current circuit-breakers

FOREWORD

1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as "IEC Publication(s)"). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
6) All users should ensure that they have the latest edition of this publication.
7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
9) IEC draws attention to the possibility that the implementation of this document may involve the use of (a) patent(s). IEC takes no position concerning the evidence, validity or applicability of any claimed patent rights in respect thereof. As of the date of publication of this document, IEC had not received notice of a patent, which may be required to implement this document. However, implementers are cautioned that this may not represent the latest information, which may be obtained from the patent database available at https://patents.iec.ch. IEC shall not be held responsible for identifying any or all such patent rights.

This extended version (EXV) of the official IEC Standard provides the user with the full content of the Standard.

IEC TS 62271-313:2025 EXV includes the content of IEC TS 62271-313:2025, and the references made to IEC TS 62271-5:2024.

The specific content of IEC TS 62271-313:2025 is displayed on a blue background.

IEC TS 62271-313 has been prepared by subcommittee 17A: Switching devices, of IEC technical committee 17: High-voltage switchgear and controlgear. It is a Technical Specification.

The text of this Technical Specification is based on the following documents:

Draft	Report on voting
17A/1413/DTS	17A/1416/RVDTS

Full information on the voting for its approval can be found in the report on voting indicated in the above table.

The language used for the development of this Technical Specification is English.

This document was drafted in accordance with ISO/IEC Directives, Part 2, and developed in accordance with ISO/IEC Directives, Part 1 and ISO/IEC Directives, IEC Supplement, available at www.iec.ch/members_experts/refdocs. The main document types developed by IEC are described in greater detail at www.iec.ch/publications.

This document is to be read in conjunction with IEC TS 62271-5:2024, to which it refers and which is applicable unless otherwise specified in this document. In order to simplify the indication of corresponding requirements, the same numbering of clauses and subclauses is used as in IEC TS 62271-5 if applicable. Modifications to these clauses and subclauses are given under the same references whilst additional subclauses are numbered from 101.

A list of all parts in the IEC 62271 series, published under the general title *High-voltage switchgear and controlgear,* can be found on the IEC website.

The committee has decided that the contents of this document will remain unchanged until the stability date indicated on the IEC website under webstore.iec.ch in the data related to the specific document. At this date, the document will be

- reconfirmed,
- withdrawn, or
- revised.

INTRODUCTION to IEC TS 62271-5:2024

This Technical Specification has been prepared by TC 17 and it defines common specifications for high-voltage direct current (HVDC) switchgear and controlgear covering both types of air insulated (AIS) and gas insulated (GIS) equipment of HVDC substations. This document includes rules for service conditions, ratings, design and construction requirements. Test requirements and criteria to proof for passing type and routine tests are defined in this document for development and manufacturing of HVDC switchgear.

This specification is applicable for both LCC and VSC HVDC technology.

SC 17A is in the process of preparing documents for the following HVDC switching devices:

– circuit-breakers (IEC TS 62271-313 [1])[1];
– disconnectors and earthing switches (IEC TS 62271-314 [2]);
– transfer switches (IEC TS 62271-315 [3]);
– by-pass switches and paralleling switches (IEC TS 62271-316 [4]).

SC 17C is in the process of preparing a document for DC gas insulated switchgears (IEC TS 62271-318 [5]).

Standardization of direct voltages is the responsibility of TC 8 (System aspects of electrical energy supply).

TC 99 (Insulation co-ordination and system engineering of high voltage electrical power installations above 1,0 kV AC and 1,5 kV DC) defines requirements of DC substations for safety of insulation, equipment, installation and earthing (IEC 61936-2).

TC 115 (High Voltage Direct Current (HVDC) transmission for DC voltages above 100 kV) is responsible for DC transmission system aspects. It is the responsibility of TC 115 to define requirements for different equipment (e. g. switching devices) from system point of view. These definitions are implemented in documents from other TCs. Several Working Groups and Maintenance Teams are preparing documents on reliability, EMC, asset management, system design, DC harmonics, testing, HVDC grids, VSC and LCC converter and insulation coordination for HVDC systems.

INTRODUCTION to IEC TS 62271-313:2025

This document mainly refers to IEC TS 62271-5. In addition, some findings and considerations from CIGRE are referred to in this document [1],[2].
