About the IEC

The International Electrotechnical Commission (IEC) is the leading global organization that prepares and publishes International Standards for all electrical, electronic and related technologies.

About IEC publications

The technical content of IEC publications is kept under constant review by the IEC. Please make sure that you have the latest edition, a corrigendum or an amendment might have been published.

IEC publications search - webstore.iec.ch/advsearchform

The advanced search enables to find IEC publications by a variety of criteria (reference number, text, technical committee, ...). It also gives information on projects, replaced and withdrawn publications.

IEC Just Published - webstore.iec.ch/justpublished

Stay up to date on all new IEC publications. Just Published details all new publications released. Available online and once a month by email.

IEC Customer Service Centre - webstore.iec.ch/csc

If you wish to give us your feedback on this publication or need further assistance, please contact the Customer Service Centre: sales@iec.ch.

IEC Products & Services Portal - products.iec.ch

Discover our powerful search engine and read freely all the publications previews, graphical symbols and the glossary. With a subscription you will always have access to up to date content tailored to your needs.

Electropedia - www.electropedia.org

The world's leading online dictionary on electrotechnology, containing more than 22 500 terminological entries in English and French, with equivalent terms in 25 additional languages. Also known as the International Electrotechnical Vocabulary (IEV) online.

CONTENTS

FOREWORD.....	5
INTRODUCTION.....	7
1 Scope.....	8
2 Normative references	9
3 Terms and definitions	9
3.1 Switchgear and controlgear.....	10
3.2 Environmental aspects.....	11
3.3 Index of definitions.....	21
3.4 Abbreviated terms.....	23
4 Description and classification of high-voltage switchgear and controlgear (SG&CG).....	24
4.1 General.....	24
4.2 Description and classification of switching devices.....	24
4.3 Description and classification of assemblies	25
5 Environmentally conscious design	26
5.1 General.....	26
5.2 Life cycle thinking	29
5.3 Reference service life	31
5.3.1 General	31
5.3.2 Service use conditions.....	31
5.4 Material circularities.....	32
6 PSR for life cycle assessment.....	32
6.1 General.....	32
6.2 Product specific rules (PSR)	32
6.3 Inputs	33
6.4 Outputs.....	35
6.5 Qualitative and quantitative assessments.....	35
6.6 LCA functional unit (LCA-FU).....	35
6.6.1 General	35
6.6.2 LCA functional unit(s) for switching devices.....	36
6.6.3 LCA standard functional unit for assemblies	47
6.7 System boundaries	56
6.7.1 General	56
6.7.2 Material circularities	58
6.7.3 Exclusions from system boundary.....	60
6.7.4 Cut-off rules for SG&CG	60
6.8 Life cycle inventory analysis	61
6.8.1 General	61
6.8.2 Manufacturing.....	61
6.8.3 Distribution	61
6.8.4 Installation.....	62
6.8.5 Use.....	62
6.8.6 End-of-life.....	62
6.9 Scenarios	63
6.9.1 General	63
6.9.2 Insulation and/or switching medium emissions aspects.....	63

6.9.3	Manufacturing and installation scenario	66
6.9.4	Distribution scenario	66
6.9.5	Use scenario	67
6.9.6	End-of-life scenarios	72
6.10	Impact categories	76
6.11	Guidance for extrapolation of LCA results within a homogenous product family	78
6.12	LCA comparison aspects	79
7	Information	79
7.1	General	79
7.2	Material declaration	80
7.2.1	General	80
7.2.2	Additional reporting recommendations	80
7.3	End-of-life information	81
7.3.1	General	81
7.3.2	End-of-life information provision	81
7.4	Digitization of high-voltage switchgear and controlgear and information related to LCA	81
7.5	LCA report	82
7.5.1	General	82
7.5.2	General information	82
7.5.3	Goal and scope of the study	83
7.5.4	Life cycle inventory analysis	83
7.5.5	Environmental impact assessment	83
7.5.6	Additional environmental information	84
Annex A (informative)	Environmental aspects in environmentally conscious design	85
A.1	General	85
A.2	Inputs and outputs to be considered	85
A.2.1	General	85
A.2.2	Inputs	85
A.2.3	Outputs	86
A.3	Tools for including environmental impacts in high-voltage switchgear and controlgear design	86
Annex B (informative)	Brief introduction to life cycle assessment (LCA)	88
B.1	General	88
B.2	Definition of the goal and scope of the LCA	88
B.3	Inventory analysis	89
B.4	Impact assessment	89
B.5	Interpretation	90
Annex C (informative)	Environmental impact criteria	91
C.1	General	91
C.2	Sustainable development goals (SDGs) and environmental impact category	91
Annex D (informative)	Equivalent energy mix – Example of calculation	101
D.1	Hypothesis	101
D.2	Example	101
Bibliography	105

Figure 1 – Overview of the defined product families SG&CG within the scope of this document..... 25

Figure 2 – General relationship between environmental aspects and associated impacts for SG&CG during their life cycle	27
Figure 3 – Example of system diagram of the whole life cycle for life cycle assessment of SG&CG	30
Figure 4 – Functional description for IEC 62271-109 AC by-pass switches > 52 kV.....	47
Figure 5 – Functional description for IEC/IEEE 62271-37-013 Generator circuit-breakers ≤ 38 kV.....	47
Figure 6 – Scheme of the analysed product system's boundaries, including the life cycle stages and unit processes, which separate it from the ecosphere (natural environment) (based on IEC 63366:—, Figure 2)	58
Figure 7 – Upstream and downstream product information.....	79
Figure C.1 – Life cycle impact assessment, from inventory to category endpoints.....	91
Figure C.2 – Life cycle impact assessment, from inventory to category midpoints	92
Figure C.3 – Relation between LCA impact categories (endpoints) and sustainable development goals.....	93
Table 1 – Abbreviated terms	23
Table 2 – Overview of the referenced standards, structure, content and the corresponding clauses/subclauses of this document	28
Table 3 – Examples of typical average environmental intended use conditions of SG&CG.....	31
Table 4 – Typical LCA-functional unit properties of switching devices	37
Table 5 – Typical LCA-functional unit properties of assemblies	49
Table 6 – Formulas for calculating the net benefits and loads beyond the system boundaries.....	59
Table 7 – Calculation of emissions during the use life cycle stage including refilling and maintenance, if applicable.....	64
Table 8 – Typical emissions factors in per unit SG&CG and by life cycle stage	66
Table 9 – Recommended scenarios for IED for use phase	67
Table 10 – Typical scenarios for switchgear and controlgear switching devices	68
Table 11 – Typical use scenarios for calculating impacts of assemblies.....	69
Table 12 – Typical load conditions for assemblies.....	69
Table 13 – Further explanation of the generic EoL treatment scenario	74
Table 14 – Recommended impact categories in LCA studies or reported in environmental declarations for SG&CG	77
Table 15 – Additional parameters to be considered in the environmental declaration per functional/reference unit	77
Table C.1 – Detailed environmental impact criteria	94
Table D.1 – Energy mix by location	101
Table D.2 – Parts manufacturing mass ratio and use unit ratio.....	102
Table D.3 – Equivalent energy mixes for manufacturing.....	103
Table D.4 – Equivalent energy mixes for installation, use and EoL.....	104
Table D.5 – Equivalent energy mixes by life cycle stages	104

INTERNATIONAL ELECTROTECHNICAL COMMISSION

HIGH-VOLTAGE SWITCHGEAR AND CONTROLGEAR –

**Part 320: Environmental aspects and life cycle assessment rules
for high-voltage switchgear and controlgear**

FOREWORD

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as "IEC Publication(s)"). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) IEC draws attention to the possibility that the implementation of this document may involve the use of (a) patent(s). IEC takes no position concerning the evidence, validity or applicability of any claimed patent rights in respect thereof. As of the date of publication of this document, IEC had not received notice of (a) patent(s), which may be required to implement this document. However, implementers are cautioned that this may not represent the latest information, which may be obtained from the patent database available at <https://patents.iec.ch>. IEC shall not be held responsible for identifying any or all such patent rights.

IEC TS 62271-320 has been prepared by IEC technical committee 17: High-voltage switchgear and controlgear. It is a Technical Specification.

The text of this Technical Specification is based on the following documents:

Draft	Report on voting
17/1161/DTS	17/1169/RVDTS

Full information on the voting for its approval can be found in the report on voting indicated in the above table.

The language used for the development of this Technical Specification is English.
