### About the IEC

The International Electrotechnical Commission (IEC) is the leading global organization that prepares and publishes International Standards for all electrical, electronic and related technologies.

### About IEC publications

The technical content of IEC publications is kept under constant review by the IEC. Please make sure that you have the latest edition, a corrigendum or an amendment might have been published.

#### IEC publications search -

[webstore.iec.ch/advsearchform](http://webstore.iec.ch/advsearchform)

The advanced search enables to find IEC publications by a variety of criteria (reference number, text, technical committee, ...). It also gives information on projects, replaced and withdrawn publications.

#### IEC Just Published - [webstore.iec.ch/justpublished](http://webstore.iec.ch/justpublished)

Stay up to date on all new IEC publications. Just Published details all new publications released. Available online and once a month by email.

#### IEC Customer Service Centre - [webstore.iec.ch/csc](http://webstore.iec.ch/csc)

If you wish to give us your feedback on this publication or need further assistance, please contact the Customer Service Centre: [sales@iec.ch](mailto:sales@iec.ch).

#### IEC Products & Services Portal - [products.iec.ch](http://products.iec.ch)

Discover our powerful search engine and read freely all the publications previews, graphical symbols and the glossary. With a subscription you will always have access to up to date content tailored to your needs.

#### Electropedia - [www.electropedia.org](http://www.electropedia.org)

The world's leading online dictionary on electrotechnology, containing more than 22 500 terminological entries in English and French, with equivalent terms in 25 additional languages. Also known as the International Electrotechnical Vocabulary (IEV) online.

## CONTENTS

FOREWORD .....	4
INTRODUCTION .....	6
1 Scope .....	7
2 Normative references .....	7
3 Terms and definitions .....	7
4 Considerations for maintenance oriented to UHV AC transmission systems .....	8
4.1 General .....	8
4.2 Maintenance needs for substation design .....	8
4.3 Spare parts .....	9
4.4 Tools .....	9
4.5 Maintenance plan .....	10
4.6 Failure and operation database .....	10
4.7 Resiliency against natural disasters .....	11
4.8 Standardization of equipment dimensions and specifications .....	11
4.9 Other .....	11
5 Substation maintenance .....	11
5.1 General .....	11
5.2 Power transformers .....	12
5.3 CBs .....	14
5.4 GIS and GIL .....	15
5.5 Surge arresters .....	15
5.6 Voltage and current transformers .....	16
5.7 Shunt reactors .....	17
5.8 Series compensators .....	18
5.9 Insulators .....	19
5.10 Air-insulated disconnectors and earthing switches .....	19
5.11 HSESs .....	20
5.12 Protection and control system .....	22
Annex A (informative) Maintenance experiences in China .....	24
A.1 Maintenance experience at the substation design stage .....	24
A.2 Maintenance experience of UHV substation .....	25
A.2.1 General .....	25
A.2.2 Maintenance experience of UHV transformers .....	25
A.2.3 Maintenance experience of switch equipment .....	28
Annex B (informative) Maintenance experiences in Japan .....	31
B.1 Examples of maintenance optimisation based on results of UHV test equipment .....	31
B.1.1 General .....	31
B.1.2 Rare-frequency characteristics of CBs .....	32
B.1.3 HSES-CB operation coordination test .....	33
B.1.4 Ease of maintenance verification .....	34
B.1.5 Advancement of design and maintenance technology for static electrification in transformers .....	35
B.2 Reducing outage time through layout design of entire substations .....	35
B.2.1 Gas-insulated busbar (GIB) cross-retracting and flat placement .....	35
B.2.2 Considerations for the arrangement of GIS detachable devices .....	36
Annex C (informative) Maintenance experiences in India .....	38

C.1	Maintenance experience in India .....	38
C.2	Modification in 1 200 kV bushing type from oil impregnated paper bushings (OIP) to resin impregnated paper bushings (RIP) .....	41
C.3	Validation of electric and magnetic field in 1 200 kV National Test Station, Bina .....	41
	Bibliography .....	45
	Figure 1 – Example of standardization of dimension of GIS bushing .....	11
	Figure A.1 – Operation space of UHV shunt reactor .....	24
	Figure A.2 – Example of 1 000 kV transformer arrangement .....	25
	Figure B.1 – Overview of verification contributing to optimisation of maintenance at the UHV equipment test site .....	32
	Figure B.2 – Opening time characteristic of 1 000 kV CB .....	33
	Figure B.3 – Oscilloscope waveform example of HSES operation coordination test results .....	34
	Figure B.4 – Example of 1 000 kV substation arrangement .....	36
	Figure B.5 – Bus-tie system applied to 1 000 kV substations (double busbar with 4 bus-coupler) .....	36
	Figure B.6 – Locations of detachable devices .....	37
	Figure C.1 – Layout of 1 200 kV National Test Station Bina .....	43
	Table 1 – Examples of tools for maintenance of an UHV substation .....	9
	Table 2 – Major equipment in the UHV substation .....	12
	Table 3 – Maintenance items of UHV power transformers .....	12
	Table 4 – Maintenance items of CBs .....	14
	Table 5 – Maintenance items of GIS and GIL .....	15
	Table 6 – Maintenance items of surge arresters .....	16
	Table 7 – Maintenance items of CVTs .....	16
	Table 8 – Maintenance items of bushing-type current transformers .....	17
	Table 9 – Maintenance items of shunt reactors .....	17
	Table 10 – Maintenance items of series compensators .....	19
	Table 11 – Maintenance items of insulators .....	19
	Table 12 – Maintenance items of air-insulated disconnectors and earthing switches .....	20
	Table 13 – Maintenance items of HSESs .....	21
	Table 14 – Maintenance items of protection and control system .....	22
	Table A.1 – Preventive tests of main transformer .....	26
	Table A.2 – Preventive tests of voltage regulating and compensation transformer .....	27
	Table A.3 – Preventive tests of whole transformer .....	28
	Table A.4 – Preventive tests of GIS (mixed technology switchgear) .....	28
	Table A.5 – Preventive tests of disconnector .....	30
	Table B.1 – HSES operation coordination test results .....	33
	Table B.2 – Workability test result of disassembly and reassembly of CB .....	34
	Table B.3 – Workability test result of disassembly and reassembly of HSES .....	35
	Table B.4 – Arrangement of detachable devices .....	37
	Table C.1 – Maintenance schedule for 1 200 kV transformers .....	38

Table C.2 – Maintenance schedule for 1 200 kV circuit breakers .....	39
Table C.3 – Maintenance schedule for 1 200 kV CVTs .....	40
Table C.4 – Maintenance schedule for 1 200 kV Disconnectors .....	40
Table C.5 – Surge arresters.....	41
Table C.6 – Occupational and public exposure limits.....	42

## INTERNATIONAL ELECTROTECHNICAL COMMISSION

## UHV AC transmission systems - Part 401: Substation maintenance

### FOREWORD

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as "IEC Publication(s)"). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) IEC draws attention to the possibility that the implementation of this document may involve the use of (a) patent(s). IEC takes no position concerning the evidence, validity or applicability of any claimed patent rights in respect thereof. As of the date of publication of this document, IEC had not received notice of (a) patent(s), which may be required to implement this document. However, implementers are cautioned that this may not represent the latest information, which may be obtained from the patent database available at <https://patents.iec.ch>. IEC shall not be held responsible for identifying any or all such patent rights.

IEC TS 63042-401 has been prepared by IEC technical committee 122: UHV AC transmission systems. It is a Technical Specification.

The text of this Technical Specification is based on the following documents:

Draft	Report on voting
122/201/DTS	122/210/RVDTS

Full information on the voting for its approval can be found in the report on voting indicated in the above table.

The language used for the development of this Technical Specification is English.

A list of all parts in the IEC 63042 series, published under the general title *UHV AC transmission systems*, can be found on the IEC website.

This document was drafted in accordance with ISO/IEC Directives, Part 2, and developed in accordance with ISO/IEC Directives, Part 1 and ISO/IEC Directives, IEC Supplement, available at [www.iec.ch/members\\_experts/refdocs](http://www.iec.ch/members_experts/refdocs). The main document types developed by IEC are described in greater detail at [www.iec.ch/publications](http://www.iec.ch/publications).

The committee has decided that the contents of this document will remain unchanged until the stability date indicated on the IEC website under [webstore.iec.ch](http://webstore.iec.ch) in the data related to the specific document. At this date, the document will be

- reconfirmed,
- withdrawn, or
- revised.
