

IEC TR 63319

Edition 1.0 2025-06

# TECHNICAL REPORT

Corrected version  
2025-06

A meta-modelling analysis approach to smart manufacturing reference models  
*Standards*

### About the IEC

The International Electrotechnical Commission (IEC) is the leading global organization that prepares and publishes International Standards for all electrical, electronic and related technologies.

### About IEC publications

The technical content of IEC publications is kept under constant review by the IEC. Please make sure that you have the latest edition, a corrigendum or an amendment might have been published.

#### IEC publications search -

[webstore.iec.ch/advsearchform](https://webstore.iec.ch/advsearchform)

The advanced search enables to find IEC publications by a variety of criteria (reference number, text, technical committee, ...). It also gives information on projects, replaced and withdrawn publications.

#### IEC Just Published - [webstore.iec.ch/justpublished](https://webstore.iec.ch/justpublished)

Stay up to date on all new IEC publications. Just Published details all new publications released. Available online and once a month by email.

#### IEC Customer Service Centre - [webstore.iec.ch/csc](https://webstore.iec.ch/csc)

If you wish to give us your feedback on this publication or need further assistance, please contact the Customer Service Centre: [sales@iec.ch](mailto:sales@iec.ch).

#### IEC Products & Services Portal - [products.iec.ch](https://products.iec.ch)

Discover our powerful search engine and read freely all the publications previews, graphical symbols and the glossary. With a subscription you will always have access to up to date content tailored to your needs.

#### Electropedia - [www.electropedia.org](https://www.electropedia.org)

The world's leading online dictionary on electrotechnology, containing more than 22 500 terminological entries in English and French, with equivalent terms in 25 additional languages. Also known as the International Electrotechnical Vocabulary (IEV) online.

## CONTENTS

FOREWORD.....	10
INTRODUCTION.....	12
1    Scope.....	13
2    Normative references.....	13
3    Terms and definitions, abbreviated terms, acronyms and conventions.....	13
3.1    Terms and definitions .....	13
3.2    Convention used for term and definition selection .....	15
3.3    Abbreviations and acronyms.....	16
3.4    Conventions used for selected references.....	17
4    Smart manufacturing (SM) .....	18
4.1    Introduction to and vision of SM.....	18
4.2    SM characteristics and differences from conventional manufacturing.....	18
4.3    Essential concepts and enabling technologies for SM .....	19
4.3.1    SM categories.....	19
4.3.2    Generic methods.....	19
4.3.3    Applications in the manufacturing domain .....	20
4.3.4    Information and communication technologies.....	20
5    Smart manufacturing reference model (SMRM) .....	21
5.1    Need for a SMRM.....	21
5.2    Objectives in more detail .....	21
5.3    SMRM focus .....	22
5.4    Reference modelling .....	22
5.5    Usage of a reference model: the OSI model.....	22
5.6    SMRM harmonization needs .....	22
5.7    SMRM abstraction stack.....	23
6    SMRM meta-modelling approach.....	23
6.1    General.....	23
6.2    Objectives.....	24
6.3    Assumptions, constraints and guidance .....	24
6.3.1    Assumptions .....	24
6.3.2    Constraints .....	24
6.3.3    Guidance .....	24
6.4    Concepts .....	25
6.4.1    General .....	25
6.4.2    Concepts of the meta-model.....	25
6.4.3    Proposition of the meta-model for SMRM.....	27
6.5    Meta-model for SMRM visualization .....	29
6.6    * <i>Facet_composition_rules</i> and * <i>aspect_collection_coherence_rules</i> .....	29
6.7    Utilizing the meta-model concept of use case.....	30
6.7.1    General .....	30
6.7.2    * <i>Use_cases</i> for articulating concerns .....	31
6.7.3    * <i>Viewpoints</i> capture concerns and specify views .....	32
6.7.4    Examples of * <i>model_content_purpose</i> .....	33
7    Mapping of the contributions for SMRMs to the SMRM meta-model.....	34
7.1    General.....	34
7.2    Mapping for Scandinavian smart manufacturing model .....	35

7.2.1	Graphical depiction of SSIF mapping .....	35
7.2.2	SSIF *facet_composition_rule.....	35
7.2.3	Business dimension *aspect_collection.....	36
7.2.4	Product dimension *aspect_collection.....	36
7.2.5	Production dimension *aspect_collection .....	37
7.2.6	Space Time dimension (Life cycle) *aspect_collection.....	37
7.3	Mapping for RAMI 4.0.....	38
7.3.1	Graphical depiction of RAMI 4.0 mapping .....	38
7.3.2	RAMI 4.0 – *facet_composition_rule .....	40
7.3.3	Service oriented architecture as a universal technical approach .....	40
7.3.4	Layers *aspect_collection_coherence_rule .....	41
7.3.5	Hierarchy Levels *aspect_collection_coherence_rule .....	42
7.3.6	Life cycle *aspect_collection_coherence_rule .....	42
7.4	Mapping for IMSA .....	43
7.4.1	Graphical depiction of IMSA mapping .....	43
7.4.2	System Hierarchy *aspect_collection_coherence_rule.....	44
7.4.3	Life Cycle *aspect_collection_coherence_rule.....	45
7.4.4	Intelligent Function *aspect_collection_coherence_rule.....	45
7.5	Mapping for ISO 15704:2019, Annex B – GERAM .....	46
7.5.1	Graphical depiction of ISO 15704:2019, Annex B – GERAM .....	46
7.5.2	GERAM *facet_composition_rules .....	46
7.5.3	Life cycle phases *aspect_collection_coherence_rule .....	47
7.5.4	Modelling viewpoints *aspect_collection_coherence_rule .....	47
7.5.5	Instantiation *aspect_collection_coherence_rule .....	48
7.5.6	Manifestation *aspect_collection_coherence_rule .....	48
7.5.7	Purpose *aspect_collection_coherence_rule .....	48
7.5.8	Implementation *aspect_collection_coherence_rule .....	49
7.6	Mapping for NIST Smart Manufacturing Standards Landscape .....	50
7.6.1	Graphical depiction of NIST Smart Manufacturing Standards Landscape mapping.....	50
7.6.2	NIST *facet_composition_rules.....	50
7.6.3	Business life cycle *aspect_collection_coherence_rule .....	51
7.6.4	Product life cycle *aspect_collection_coherence_rule.....	52
7.6.5	Production life cycle *aspect_collection_coherence_rule .....	52
7.6.6	Manufacturing pyramid *aspect_collection_coherence_rule .....	53
7.7	Mapping for KSTEP cube framework.....	54
7.7.1	Graphical depiction of KSTEP cube framework mapping .....	54
7.7.2	Space axis 1 *aspect_collection_coherence_rule .....	54
7.7.3	Space axis 2 *aspect_collection_coherence_rule .....	54
7.7.4	Time axis t *aspect_collection_coherence_rule .....	54
7.8	Mapping for IVRA Next.....	55
7.8.1	Graphical depiction of IVRA Next mapping.....	55
7.8.2	Three axes of SM facet and SMU facet composition rules .....	55
7.8.3	Product axis (thing) *aspect_collection_coherence_rule .....	56
7.8.4	Service axis (occurrence) *aspect_collection_coherence_rule .....	56
7.8.5	Knowledge axis *aspect_collection_coherence_rule .....	56
7.8.6	Asset view *aspect_collection_coherence_rule .....	57
7.8.7	Management view *aspect_collection_coherence_rule .....	57
7.8.8	Activity view *aspect_collection_coherence_rule .....	58

7.9	Mapping for IIC Industrial Internet Reference Architecture.....	59
7.9.1	Graphical depiction of IIC IIRA mapping .....	59
7.10	Mapping for Smart Manufacturing Standards Map (SM2) .....	60
7.10.1	Graphical depiction of Smart Manufacturing Standards Map (SM2).....	60
7.10.2	SM2 *facet_composition_rules .....	62
7.11	Mapping for URM-MM .....	62
7.11.1	Graphical depiction of URM-MM .....	62
7.11.2	URM-MM *facet_composition_rules .....	63
7.11.3	Model/Organization *aspect_collection_coherence_rule .....	63
7.11.4	URM-MM *aspect_collection_coherence_rule .....	64
8	Analysis of particular collections of aspects.....	64
8.1	Identification of a set of common *aspects_collections .....	64
8.2	Life cycle .....	65
8.2.1	General .....	65
8.2.2	Overview on contributions for SMRMs .....	65
8.2.3	Particularities of contributions for SMRMs with respect to life cycle .....	67
8.2.4	Fundamental questions concerning life cycle aspects of a SMRM.....	70
8.2.5	Observed consequences to the life cycle questions.....	70
8.2.6	Outlook.....	72
8.3	Hierarchy .....	72
8.3.1	General .....	72
8.3.2	Overview on contributions for SMRMs with respect to hierarchy .....	72
8.3.3	Particularities of contributions for SMRMs with respect to hierarchy .....	73
8.3.4	Fundamental questions concerning hierarchy aspects of a SMRM.....	78
8.3.5	Observed consequences to the hierarchy questions .....	78
8.3.6	Outlook.....	79
8.4	Layer .....	79
8.4.1	General .....	79
8.4.2	Overview on contributions for SMRMs .....	80
8.4.3	Particularities of contributions for SMRMs with respect to layer .....	81
8.4.4	Fundamental questions concerning layer aspects of a SMRM.....	82
8.4.5	Observed consequences to the layer questions .....	82
8.4.6	Outlook.....	83
8.5	Additional aspects .....	85
8.5.1	General .....	85
8.5.2	Fundamental questions concerning additional *aspect_collections of a SMRM .....	85
8.5.3	Observed consequences to the additional *aspect_collections questions .....	85
9	Toward a family of SMRM representations .....	88
9.1	Expectations for a unifying SMRM .....	88
9.2	Identification of generic (timeless) principles for SMRM.....	89
9.3	Structurally addressing the missing smart technologies .....	90
9.4	Observations from mapping and analysis .....	91
9.5	Candidate *aspect_collection_coherence_rules and *facet_composition_rules .....	92
9.6	The family of SMRM representations .....	93
9.7	The case for *use_case .....	94
9.8	Approaching creation of the SMRM.....	95
Annex A (informative)	Objectives and terms of reference for JWG 21 .....	97

A.1	Objectives .....	97
A.2	Terms of reference .....	97
Annex B (informative)	Contributions for SMRMs .....	98
B.1	RAMI .....	98
B.1.1	General .....	98
B.1.2	Layer axis .....	99
B.1.3	Life cycle axis in RAMI 4.0 .....	101
B.2	IMSA .....	105
B.2.1	Intelligent manufacturing system framework.....	105
B.2.2	Life cycle .....	105
B.2.3	System hierarchy .....	106
B.2.4	Intelligence characteristics .....	106
B.2.5	Structural diagram of intelligent manufacturing standard system .....	107
B.3	GERAM .....	109
B.3.1	Rationale for enterprise-reference architecture and methodologies.....	109
B.3.2	Generalized enterprise-reference architecture and methodologies.....	109
B.3.3	Framework for enterprise architecture and enterprise integration .....	111
B.4	NIST Smart Manufacturing EcoSystem and Standards Landscape.....	115
B.5	KSTEP cube framework for standards.....	117
B.5.1	Skeleton meta-model .....	117
B.5.2	KSTEP cube framework .....	119
B.6	IVRA Next.....	121
B.6.1	General .....	121
B.6.2	Overview .....	121
B.6.3	Evolutional Model in Manufacturing .....	125
B.7	ISO/TC 184 Automation systems and integration – the Big Picture of standards (ISO TR 23087:2018 [40]) .....	130
B.7.1	History .....	130
B.7.2	Purpose .....	131
B.7.3	Summary of axis and facets of the ISO/TC 184 Big picture of standards diagram and matrix .....	133
B.8	AIF framework and reference model for SM Standard Landscape (France) .....	134
B.8.1	History .....	134
B.8.2	Purpose .....	134
B.8.3	Summary of facets and blocks of the AIF RM for SM Standard Landscape .....	136
B.9	ISO-IEC Smart Manufacturing Standards Landscape (SM2) .....	138
B.9.1	History .....	138
B.9.2	Terms of reference.....	139
B.9.3	SM2 framework.....	139
B.9.4	SM2 vocabulary .....	142
B.10	URM-MM .....	144
B.10.1	Background .....	144
B.10.2	Overview .....	144
B.10.3	Usage.....	145
B.10.4	Practical use-case.....	145
B.10.5	Illustration of Relevant International Standards Mapping .....	149
B.11	Scandinavian model .....	151
B.11.1	Scandinavian Semantic Model Design Principles .....	151

B.11.2 Domain Semantic Model exemplified by Product Dimension .....	153
B.12 UK Model.....	155
Annex C (informative) Definition of smart manufacturing, and interpretations .....	157
Annex D (informative) Concepts of Meta-modelling.....	158
Bibliography .....	160
 Figure 1 – Example of transition from centralized to distributed system paradigm.....	18
Figure 2 – SMRM abstraction stack.....	23
Figure 3 – Meta-model for SMRM.....	29
Figure 4 – Segments of the SMRM meta-model .....	31
Figure 5 – Relation between typical concerns and use-cases on SM .....	32
Figure 6 – Example of an implementation model for *use-case #1 .....	32
Figure 7 – Illustration about relation between a SMRM and a *stakeholder.....	33
Figure 8 – Mapping for Scandinavian smart manufacturing model .....	35
Figure 9 – Mapping for RAMI 4.0 .....	38
Figure 10 – Mapping for IMSA.....	44
Figure 11 – Mapping for ISO 15704:2019 – GERAM Annex.....	46
Figure 12 – Mapping for NIST Smart Manufacturing Standards Landscape.....	50
Figure 13 – NIST SMS Ecosystem – Integrated Smart Manufacturing.....	51
Figure 14 – Mapping for KSTEP cube framework.....	54
Figure 15 – IVRA Next: Mapping to Three Axes of SM and SMU .....	55
Figure 16 – Mapping for IIC IIRA .....	59
Figure 17 – System representation # 1 .....	61
Figure 18 – System representation # 2 .....	62
Figure 19 – Mapping for URM-MM .....	63
Figure 20 – The validity of individual exemplary life cycles on elements over time .....	65
Figure 21 – Graphical overview on different contributions for SMRMs .....	66
Figure 22 – Graphical overview on different contributions for SMRMs with respect to Hierarchy.....	73
Figure 23 – Graphical overview on different contributions for SMRMs .....	81
Figure 24 – N <sup>2</sup> *aspect_collection of semantic coherence .....	93
Figure 25 – Basic structure for a family of SMRM with alternative 3D representations.....	94
Figure 26 – Basic structural representation for several of the contributions – SSIF, RAMI 4.0, IMSA, and IVRA Next .....	94
Figure B.1 – The viewpoint of the RAMI 4.0 model.....	98
Figure B.2 – Linking of life cycles .....	103
Figure B.3 – Factory reference architecture model as of IEC 62264-1 and IEC 61512-1, with Industrie 4.0 enhancements .....	104
Figure B.4 – Intelligent Manufacturing System Framework .....	105
Figure B.5 – Structural diagram of intelligent manufacturing standard system.....	107
Figure B.6 – Mapping between IMSA and standard system structure.....	108
Figure B.7 – GERAM-ISO (Generalized Enterprise Reference Architecture and Methodology – ISO) framework components.....	112
Figure B.8 – GERA Modelling Framework representation with Modelling Views .....	113
Figure B.9 – Smart Manufacturing Ecosystem.....	116
