Foreword	iv
Introduction	v
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Measurement procedures and requirements	2
4.1 Frequency range.....	2
4.2 Measurement of sound pressure levels.....	3
4.2.1 General.....	3
4.2.2 Minimum separation distances for microphone positions.....	3
4.2.3 Averaging times.....	3
4.2.4 Energy average sound pressure level.....	3
4.3 Correction for background noise level.....	4
4.4 Measurement of airborne sound insulation.....	4
4.4.1 General.....	4
4.4.2 Measurements with fixed microphone positions.....	5
4.4.3 Measurements with a continuously moving microphone.....	5
4.5 Measurement of impact sound insulation.....	5
4.5.1 General.....	5
4.5.2 Measurements with fixed microphone positions.....	5
4.5.3 Continuously moving microphone.....	5
4.6 Measurement of reverberation time and evaluation of the equivalent sound absorption area.....	6
4.6.1 General.....	6
4.6.2 Measurement of reverberation time.....	6
4.6.3 Equivalent sound absorption area.....	6
4.7 Measurement of structural reverberation time.....	7
4.8 Measurement of radiated sound power by surface velocity of elements.....	7
5 Sound insulation measurements	8
5.1 General.....	8
5.2 General procedure for the determination of airborne sound insulation.....	8
5.2.1 General.....	8
5.2.2 Fixed microphone positions and multiple loudspeakers operating simultaneously or a moving loudspeaker.....	8
5.2.3 Fixed microphone positions and a single loudspeaker operated at more than one position.....	8
5.2.4 Continuously moving microphone and multiple loudspeakers operating simultaneously or a moving loudspeaker.....	9
5.2.5 Continuously moving microphone and a single loudspeaker operated at more than one position.....	9
5.3 General procedure for the determination of impact sound insulation of floors.....	9
5.3.1 General.....	9
5.3.2 Fixed microphone position.....	9
5.3.3 Continuously moving microphone.....	9
Annex A (informative) Additional procedures for measurements at low frequencies	10

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT), see www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 43, *Acoustics*, Subcommittee SC 2, *Building acoustics*, in collaboration with the European Committee for Standardization (CEN) Technical Committee CEN/TC 126, *Acoustic properties of building elements and of buildings*, in accordance with the Agreement on technical cooperation between ISO and CEN (Vienna Agreement).

This second edition cancels and replaces the first edition (ISO 10140-4:2010), which has been technically revised.

The main changes compared to the previous edition are as follows:

- all references in the text have been updated;
- in [Clause 2](#), the normative references have been updated;
- in [Clause 3](#), the terms and definitions have been updated;
- in [4.8](#) first and last paragraph have been edited;
- in [5.3.3](#) the Note has been edited.

A list of all parts in the ISO 10140 series can be found on the ISO website.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.
