Licensing and use terms

ISO 10767-3:2025

As stated above, ISO documents, as well as any updates and/or corrections, and any intellectual property or other rights pertaining thereto, are owned by ISO. ISO documents are licensed, not sold. This document does not in any way operate to assign or transfer any intellectual property rights from ISO to the user. ISO documents are protected by copyright law, database law, trademark law, unfair competition law, trade secrecy law, and any other applicable law. Users acknowledge and agree to respect ISO's intellectual property rights in the ISO documents.

The use of ISO documents is subject to the terms and conditions of the applicable licence agreement.

ISO documents are provided under different licensing agreement types ("Licence Type") allowing a non-exclusive, non-transferable, limited, revocable right to use/access the ISO documents for one or more of the purposes described below ("Purpose"), which may be internal or external in scope. The applicable Purpose(s) must be agreed in the purchase order and/or in the applicable licence agreement.

a) Licence Type:

- 1) Single registered end-user licence (watermarked in the user's name) for the specified Purpose. Under this license, the user cannot share the ISO document with a third party, including on a network.
- 2) Network licence for the specified Purpose. The network licence can be assigned to either unnamed concurrent end-users or named concurrent end-users within the same organization.

b) Purpose:

- 1) Internal Purpose. Internal use only within the user's organization, including but not limited to own implementation ("Internal Purpose").

The scope of permitted internal use is specified at the time of purchase or through subsequent agreement with ISO, the ISO member body in the user's country, any other ISO member body or an authorized third-party distributor, including any applicable internal use rights (such as for internal meetings, internal training programmes, preparation of certification services, for integration or illustration in internal manuals, internal training materials, and internal guidance documents). Each internal use must be explicitly specified in the purchase order and/or in the applicable licence agreement, and specific fees and requirements apply to each permitted use.

- 2) External Purpose. External use, including but not limited to:

- testing services;
- inspection services;
- certification services;
- auditing services;
- consulting services;
- conformity assessment scheme development and implementation;
- training services;
- education;
- research;
- software development and other digital platform or software-enabled digital services;
- any other services or activities conducted by the user or the user's organization to third parties, whether for commercial or non-commercial purposes ("External Purpose").

The scope of permitted external use is specified at the time of purchase or through subsequent agreement with ISO, the ISO member body in the user's country, any other ISO member body or an authorized third-party distributor, including any applicable external use rights (e.g. in publications, products, or services marketed and sold by the user/the user's organization). Each external use must be explicitly specified in the purchase order and/or in the applicable licence agreement, and specific fees and requirements apply to each permitted use.

Unless users have been granted use rights according to the above provisions, they are not granted the right to share or sublicense ISO documents inside or outside their organization for either Purpose. If users wish to obtain additional use rights for ISO documents or their content, users can contact ISO or the ISO member body in their country to explore possible options.

If the user or the user's organization is granted a licence for the External Purpose of providing any of the following services to third parties:

- testing services;
- inspection services;

- certification services;
- auditing services;
- consulting services,

and if any of these five (5) services reference, rely upon, incorporate, or otherwise make use of any aspect, requirement, provision, or any other information of any ISO document, the user or the user's organization agrees to verify that the third party receiving such services has obtained from the ISO member body in their country, any other ISO member body, ISO or an authorized third-party distributor, a valid licence for its own implementation of such ISO document or other use related to such services. This verification obligation must be included in the applicable licence agreement obtained by the user or the user's organization.

ISO documents must not be disclosed to third parties, and users must use them solely for the purpose specified in the purchase order and/or applicable licensing agreement. Unauthorized disclosure or use of ISO documents beyond the licensed purpose is prohibited and can result in legal action.

Use restrictions

Except as provided for in the applicable licence agreement and subject to a separate licence by ISO, the ISO member body in the user's country, any other ISO member body or an authorized third-party distributor, users are not granted the right to:

- use ISO documents for any purpose other than the Purpose;
- grant use or access rights to ISO documents beyond the Licence Type;
- disclose ISO documents beyond the intended Purpose and/or Licence Type;
- sell, lend, lease, reproduce, distribute, import/export or otherwise commercially exploit ISO documents. In the case of documents that are joint publications (such as ISO/IEC documents), this clause applies to the respective joint copyright ownership;
- assign or otherwise transfer ownership of ISO documents, in whole or in part, to any third party.

Regardless of the Licence Type or Purpose for which users are granted access and use rights for ISO documents, users are not permitted to access or use any ISO documents, in whole or in part, for any machine learning and/or artificial intelligence and/or similar purposes, including but not limited to accessing or using them

- a) as training data for large language or similar models, or
- b) for prompting or otherwise enabling artificial intelligence or similar tools to generate responses.

Such use is only permitted if expressly authorized through a specific licence agreement by the ISO member body in the requester's country, another ISO member body, or ISO. Requests for such authorization are considered on a case-by-case basis to ensure compliance with intellectual property rights. Specifically, it is not possible to claim the benefit of copyright exception of Article 4 of the Directive (EU) 2019/790 of the European Parliament and of the Council of 17 April 2019 on copyright and related rights in the Digital Single Market, for the purpose of text and data mining on ISO documents, as ISO hereby opts out of this exception.

If ISO, or the ISO member body in the user's country, has reasonable doubt that users are not compliant with these terms, it can request in writing to perform an audit, or have an audit performed by a third-party auditor, during business hours at the user's premises or via remote access.
