Foreword	vi
Introduction	vii
1 Scope	1
2 Normative references	2
3 Terms and definitions	3
4 Safety requirements and/or protective/risk reduction measures	8
4.1 General	8
4.1.1 General	8
4.1.2 Sharp edges and acute angles	8
4.1.3 Stored energy components	8
4.2 Starting/moving and stopping	8
4.2.1 Unauthorized starting	8
4.2.2 Stopping system	8
4.2.3 Unintended movement	8
4.2.4 Uncontrolled motion	9
4.2.5 Powered travel movement	9
4.2.6 Non-activation of the parking brake	9
4.2.7 Brakes	9
4.3 Electrical and electronic systems	9
4.3.1 General	9
4.3.2 Degree of protection	10
4.3.3 Electrical connections	10
4.3.4 Batteries	11
4.4 Controls	11
4.4.1 General	11
4.4.2 Multiple operating positions	13
4.4.3 Controls of trucks accessible from ground level	13
4.4.4 Inadvertent activation	13
4.4.5 Travel controls	13
4.4.6 Differential locking	15
4.4.7 Steering controls	15
4.4.8 Load-handling controls	16
4.4.9 Multi-function controls	17
4.4.10 Stabilizing device control	17
4.4.11 Sway/levelling control	17
4.4.12 Axle oscillation locking-mechanism control	17
4.4.13 Hand throttle control	17
4.5 Power systems and accessories	17
4.5.1 Exhaust systems	17
4.5.2 Cooling systems	18
4.5.3 Tanks and pressure vessels	18
4.6 Stabilizing devices	18
4.7 Design requirements for maintenance purposes	19
4.7.1 General	19
4.7.2 Tilttable cab support device	19
4.8 Systems for lifting, tilting and reaching	19
4.8.1 Chains and wire ropes	19
4.8.2 Hydraulic system	20
4.8.3 Maximum load-lowering speed	21
4.8.4 Limitation of stroke	21
4.8.5 Fork arms, attachments and attachment brackets	21
4.9 Operator's station	21
4.9.1 General requirements	21

4.9.2	Storage of operator's manual	21
4.9.3	Hot parts	21
4.9.4	Pipes and hoses	22
4.9.5	Operator's station equipped with enclosed cab	22
4.9.6	Operator's seat	24
4.9.7	Control panels and symbols on displays	25
4.9.8	Other indicating devices	25
4.10	Operator access	25
4.10.1	General requirements	25
4.10.2	Enclosed cab openings	25
4.11	Protective measures and devices	26
4.11.1	Hot parts	26
4.11.2	Protection against crushing, shearing and trapping	26
4.11.3	Guards	26
4.11.4	Engine compartment	26
4.11.5	Fenders	27
4.11.6	Roll-over protective structures (ROPS) and falling object protective structures (FOPS)	27
4.11.7	Elevating and/or tiltable operator's station	27
4.11.8	Audible warning devices	27
4.12	Stability	27
4.12.1	Stability tests on tilting platform	27
4.12.2	Longitudinal load moment control	27
4.13	Visibility	27
4.14	External lighting devices	27
4.15	Fire protection	28
4.15.1	Fire resistance	28
4.15.2	Fire extinguisher	28
4.16	Retrieval, transportation, lifting and towing	28
4.16.1	General	28
4.16.2	Retrieval	28
4.16.3	Tie-down	28
4.16.4	Lifting	28
4.16.5	Towing	28
4.17	Noise	28
4.18	Electromagnetic compatibility	29
5	Verification of requirements and safety measures	29
5.1	General	29
5.2	Functional verification	29
5.3	Structural verification	29
5.3.1	Test loads	29
5.3.2	Static test	29
5.3.3	Dynamic testing	30
5.4	Load holding verification	30
5.5	Maximum load lowering speed	30
6	Information for use	31
6.1	Instruction handbook	31
6.1.1	General	31
6.1.2	Operating and maintenance instructions	31
6.1.3	Instructions regarding the truck	32
6.1.4	Instructions regarding the operational use of the truck	32
6.1.5	Instructions regarding internal combustion engine trucks	33
6.1.6	Instructions regarding transportation and storage of trucks	33
6.1.7	Instructions regarding inspection and routine maintenance	33
6.2	Graphical symbols and warnings	34
6.2.1	Safety signs and graphical symbols	34
6.2.2	Graphical symbols lift point	34

6.2.3	Graphical symbols tie-down point	34
6.2.4	Graphical symbols of retrieval point	34
6.2.5	Graphical symbols for pneumatic tyre inflation pressures	35
6.2.6	Graphical symbol for fuel filling points	35
6.2.7	Graphical symbol for hydraulic fluid filling points	35
6.2.8	Graphical symbol for stored energy components	36
6.2.9	Graphical symbol for brake fluid filling points	36
6.2.10	Graphical symbol for battery disconnection	36
6.2.11	Warnings	36
6.3	Marking	37
6.3.1	Manufacturer plate(s)	37
6.4	Load charts	37
6.4.1	Trucks with load-carrying attachments	37
6.4.2	Trucks with non-load-carrying attachments	38
Annex A (informative) List of significant hazards		39
Annex B (normative) Attachments and attachment brackets		43
Annex C (normative) Elevating operator's stations		46

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT) see www.iso.org/iso/foreword.html.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.

This document was prepared by Technical Committee ISO/TC 110, *Industrial trucks*, Subcommittee SC 4, *Rough-terrain trucks*.

This second edition cancels and replaces the first edition (ISO 10896-1:2012), which has been technically revised.

The main changes compared to the previous edition are as follows:

- the document has been aligned with regional standards;
- a new steering test has been added;
- new requirements for the hydraulic circuit have been introduced.

A list of all parts in the ISO 10896 series can be found on the ISO website.

Introduction

This document is a type-C standard as stated in ISO 12100.

This document is of relevance, in particular, for the following stakeholder groups representing the market players with regard to machinery safety:

- machine manufacturers (small, medium and large enterprises);
- health and safety bodies (regulators, accident prevention organisations, market surveillance etc.)

Others can be affected by the level of machinery safety achieved with the means of the document by the above-mentioned stakeholder groups:

- machine users/employers (small, medium and large enterprises);
- machine users/employees (e.g. trade unions, organizations for people with special needs);
- service providers, e. g. for maintenance (small, medium and large enterprises);
- consumers (in case of machinery intended for use by consumers).

The above-mentioned stakeholder groups have been given the possibility to participate at the drafting process of this document.

The machinery concerned and the extent to which hazards, hazardous situations or hazardous events are covered are indicated in the Scope of this document.

When requirements of this type-C standard are different from those which are stated in type-A or type-B standards, the requirements of this type-C standard take precedence over the requirements of the other standards for machines that have been designed and built according to the requirements of this type-C standard.

This document has been developed in order to align as far as possible its requirements to those of the applicable regional standards in Australia, EU, USA.
