Foreword	v
Introduction	vi
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Guidelines for choice of method	2
4.1 General	2
4.2 Sand, kaolin or ceramic suction tables for determination of pressures from 0 kPa to –50 kPa	2
4.3 Porous plate and burette apparatus for determination of pressures from 0 kPa to –20 kPa	2
4.4 Pressure plate extractor for determination of pressures from –5 kPa to –1 500 kPa	2
4.5 Pressure membrane cells for determination of pressures from –33 kPa to –1 500 kPa	3
5 Sampling	3
5.1 General requirements	3
5.2 Sample preparation	4
6 Determination of the soil water characteristic using sand, kaolin and ceramic suction tables	5
6.1 Principle	5
6.2 Apparatus	5
6.3 Preparation of suction tables	6
6.4 Procedure	6
6.5 Expression of results	6
6.5.1 Procedure for soils containing less than 20 % stones (diameter greater than 2 mm)	6
6.5.2 Conversion of results to a fine soil basis	7
7 Determination of soil water characteristic using a porous plate and burette	8
7.1 Principle	8
7.2 Apparatus	8
7.3 Assembly of porous plate/burette apparatus	8
7.4 Procedure	9
7.5 Expression of results	9
8 Determination of soil water characteristic by pressure plate extractor	11
8.1 Principle	11
8.2 Apparatus	11
8.3 Assembly of apparatus	12
8.4 Procedure	12
8.5 Calculation and expression of results	13
8.5.1 Procedure for stoneless soils	13
8.5.2 Procedure for stony soils	13
9 Determination of soil water characteristic using pressure membrane cells	14
9.1 Principle	14
9.2 Apparatus	14
9.3 Assembly of apparatus	14
9.4 Procedure	15
9.5 Expression of results	16
9.6 Test report	16
10 Test report	16
11 Precision	17

Annex A (informative) Construction of suction tables	18
Bibliography	23

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation on the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT) see the following URL: www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 190, *Soil quality*, Subcommittee SC 3, *Chemical methods and soil characteristics*.

This second edition cancels and replaces the first edition (ISO 11274:1998), which has been technically revised. It also incorporates the Technical Corrigendum ISO 11274:1998/Cor. 1:2009.
