Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 3.

Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

Attention is drawn to the possibility that some of the elements of this International Standard may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights.

International Standard ISO 11312 was prepared by Technical Committee ISO/TC 42, *Photography*.

This second edition cancels and replaces the first edition (ISO 11312:1993, *Photography — Film dimensions — Film for electronic scanner use*) and ISO 6407:1992, *Photography — Film dimensions — Graphic arts*, featuring a new emphasis on general cutting rules as opposed to listing all known sizes specifically. New definitions have been added to assist the reader.

Annex A of this International Standard is for information only.

Introduction

This International Standard replaces a number of standards relating to sheets of sensitized material for the pre-press industry. It features a simplified set of rules for dimensioning new sizes. It is hoped that the use of this International Standard will promote the compatibility of sensitized material and equipment.
