
**Large yachts — Strength,
weathertightness and watertightness
of glazed openings —**

Part 2:

**Glazed opening integrated into
adjacent structure (elastically
bonded to bulkhead or shell)
design criteria, structural support,
installation and testing**

*Grands yachts — Résistance, imperméabilité au mauvais temps et
étanchéité des ouvertures vitrées —*

<https://standards.iteh.ai/catalog/standard/ISO/11336-2:2020> **Partie 2: Critères de conception, support structurel, installation et
essais des ouvertures vitrées faisant partie intégrale de la structure
adjacente (directement collées sur la cloison ou le bordé)**

Foreword	v
1 Scope	1
2 Normative references	1
3 Terms and definitions	2
4 Symbols	10
5 Bonding materials	11
5.1 General	11
5.2 Physical characteristics	11
5.2.1 Flexural modulus	11
5.2.2 Elongation	11
5.2.3 Shear modulus	11
5.2.4 Tensile strength	11
5.2.5 Shore hardness	12
5.2.6 Environmental resistance	12
5.2.7 Long term properties	12
5.2.8 Preparation of bonding surfaces	12
5.2.9 Glazing material	12
5.3 Minimum material properties	12
6 Bonding arrangement	12
6.1 Glazing	12
6.2 General	13
6.3 Sloped and overhead glazed openings — Bonding in tension	15
6.4 Insulated glazed units (IGUs)	15
6.5 Bonding limitations	16
7 Bonded joint design	16
7.1 General	17
7.1.1 Overview	17
7.1.2 LC1 — Static permanent load only applicable to unsupported system	19
7.1.3 LC2 — Dynamic load	19
7.1.4 LC3 — Fatigue load	20
7.1.5 LC4 — Dynamic load (accounting for accidental internal loads)	20
7.1.6 Bondline parameters limitations	21
7.2 Design loads	21
7.3 Design parameters	22
8 Bonding installation	23
8.1 Bonding application guidelines	23
8.2 Bonding installation procedures	24
9 Qualification of bonding personnel	24
10 Survey of bonding	24
11 Testing	24
11.1 Testing of materials	24
11.2 Proof testing of bonded joint	25
Annex A (informative) Worked example for bondline calculation	26
Annex B (informative) Calculation method for bondline parameters with superimposed additional mechanical deflection and different design temperatures of glazing and substrate	30
Annex C (informative) Example bonding procedures	34
Annex D (informative) Special application glazing — Guidance	35

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT), see www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 8, *Ships and marine technology*, Subcommittee SC 12, *Large yachts*.

A list of all parts in the ISO 11336 series can be found on the ISO website.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.
