

International Standard

ISO 12219-12

Interior air of road vehicles —

Part 12:

**Test methods for the determination
of fogging characteristics of trim
materials made from polyvinyl
chloride (PVC) or polyurethane in
the interior of automobiles**

Air intérieur des véhicules routiers —

*Partie 12: Méthodes d'essai pour la détermination des
caractéristiques d'embuage des matériaux de garnissage en
polyvinylchlorure (PVC) ou en polyuréthane dans l'habitacle
automobile*

**First edition
2025-05**

Foreword	iv
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Principle	1
5 Apparatus and materials	2
6 Sample preparation	5
7 Conditioning	6
8 Procedure	6
8.1 Cleaning	6
8.1.1 General	6
8.1.2 Cleaning with a dishwasher	6
8.1.3 Manual cleaning	6
8.1.4 Polishing of glass surface	6
8.2 Reference tests	6
8.3 Placement of test specimens	7
8.4 Measurements prior to the fogging test	7
8.5 Fogging test	7
8.5.1 Set-up	7
8.5.2 Determination of the fogging value, F	8
8.5.3 Determination of the mass of condensable constituents, G	8
9 Expression of results	9
9.1 Fogging value	9
9.2 Mass of condensable constituents	9
10 Test report	9
Annex A (informative) Comparison of air chamber and oil bath test results	11
Annex B (informative) Confirmation of fogging test bath accuracy by DIDP	13
Annex C (informative) Effect of polishing glass plate surface	14
Bibliography	16

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

ISO draws attention to the possibility that the implementation of this document may involve the use of (a) patent(s). ISO takes no position concerning the evidence, validity or applicability of any claimed patent rights in respect thereof. As of the date of publication of this document, ISO had not received notice of (a) patent(s) which may be required to implement this document. However, implementers are cautioned that this may not represent the latest information, which may be obtained from the patent database available at www.iso.org/patents. ISO shall not be held responsible for identifying any or all such patent rights.

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT), see www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 146, *Air quality*, Subcommittee SC 6, *Indoor air*.

A list of all parts in the ISO 12219 series can be found on the ISO website.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.
