Foreword	v
Introduction	vi
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Principles	1
5 Typical areas for application of screening methods	2
5.1 General.....	2
5.2 Support of sampling/sample preparation processes.....	2
5.3 On-site verification.....	2
5.4 Monitoring of processes.....	2
5.5 Identification of homogeneity/heterogeneity of bulk material.....	2
5.6 Survey of contaminated sites (hot-spot identification).....	2
5.7 Identification of sources of contamination.....	2
5.8 Monitoring of large areas.....	2
5.9 Safety issues.....	3
6 Selection of a screening method	3
6.1 General objectives.....	3
6.2 Data quality objectives (DQOs).....	4
6.3 Selection criteria.....	4
6.3.1 General.....	4
6.3.2 Sampling/sample pre-treatment/preparation.....	5
6.4 Checks for the selection of candidate methods.....	5
6.4.1 General.....	5
6.4.2 Parameter definition.....	5
6.4.3 Field of application.....	5
6.4.4 Method characteristics.....	5
6.4.5 Boundary conditions.....	6
6.5 Fit-for-purpose test.....	6
6.6 Quality targets.....	6
7 Applicability conditions for screening methods	7
7.1 General.....	7
7.2 Performance requirements.....	7
7.3 Screening method applicability.....	8
7.3.1 General.....	8
7.3.2 Measurement conditions.....	8
7.3.3 Principle of the measurement.....	8
7.3.4 Instruction for method setup.....	8
7.3.5 Sampling and samples.....	9
7.3.6 Measurement steps.....	9
7.3.7 Statement of results.....	9
7.3.8 Sample and reagent disposal.....	9
7.3.9 Characteristic data of the method.....	9
8 Fit-for-purpose evaluation	10
8.1 General.....	10
8.2 Accuracy testing.....	10
8.3 Exclusion of false negative results.....	10
8.4 Testing of individual comparability.....	11

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation on the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT) see the following URL: www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 190, *Soil quality, SC 3, Chemical and physical characterization*.

This second edition cancels and replaces the first edition (ISO 12404:2011), which has been technically revised.

The main changes compared to the previous edition are as follows:

- The contents of ISO 12404:2011 and EN 16123:2013 were merged;
- The scope was widened to include waste;
- The document was developed parallel with CEN according to the Vienna Agreement;
- The text was editorially revised.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.
