

International
Standard

ISO 13548

**Copper and zinc sulfide
concentrates — Determination
of fluorine content by sodium
hydroxide fusion and fluoride ion
selective electrode detection**

*Concentrés sulfurés de cuivre et de zinc — Dosage du fluor
par fusion à l'hydroxyde de sodium et détection par électrode
sélective des ions fluorure*

**First edition
2025-08**

Foreword	iv
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Principle	2
5 Reagents	2
6 Apparatus	3
7 Instrument operating parameters	4
8 Sampling and sample preparation	4
8.1 Laboratory sample	4
8.2 Test sample	4
9 Procedure	4
9.1 Number of determinations	4
9.2 Test portion	4
9.3 Blank test	5
9.4 Dissolution of the test portion by NaOH fusion	5
9.5 Leaching	5
9.6 Preparation of the leach solution	5
9.7 Preparation of solution for introduction to fluoride ion selective electrode	6
9.8 Preparation of the calibration solutions and stabilization solution	6
9.9 Preparation of fluorine calibration	6
9.9.1 General	6
9.9.2 Conditioning of the fluoride ion selective electrode	6
9.9.3 Potential stabilization	7
9.9.4 Temperature control	7
9.9.5 Electrode handling for concentration measurement	7
9.9.6 Procedure for reducing measurement variability	7
9.9.7 Calibration graph plotting method	7
9.10 Determination of fluorine content in the test solutions	7
10 Calculations	7
11 Procedure for obtaining the final result	9
12 Test report	9
13 Precision	9
13.1 Expression of precision	9
13.2 Procedure for obtaining the final result	10
13.3 Interlaboratory precision	10
13.4 Check of trueness	11
13.4.1 General	11
13.4.2 Type of certified reference material or reference material	11
Annex A (normative) Procedure for obtaining the final results	12
Annex B (informative) Procedure for the preparation and determination of the mass of a predried test portion	13
Annex C (informative) Trueness test	15
Bibliography	18

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO document should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

ISO draws attention to the possibility that the implementation of this document may involve the use of (a) patent(s). ISO takes no position concerning the evidence, validity or applicability of any claimed patent rights in respect thereof. As of the date of publication of this document, ISO had not received notice of (a) patent(s) which may be required to implement this document. However, implementers are cautioned that this may not represent the latest information, which may be obtained from the patent database available at www.iso.org/patents. ISO shall not be held responsible for identifying any or all such patent rights.

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT), see www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 183, *Copper, lead, zinc and nickel ores and concentrates*.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.
