Foreword	v
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Establishing a sampling scheme	1
4.1 General	1
4.2 Design of the sampling scheme	2
4.2.1 Material to be sampled	2
4.2.2 Division of lots	2
4.2.3 Basis of sampling	2
4.2.4 Precision of sampling	2
4.2.5 Bias of sampling	3
4.3 Precision of results	3
4.3.1 Precision and total variance	3
4.3.2 Primary increment variance	3
4.3.3 Preparation and testing variance	4
4.3.4 Number of sub-lots and number of increments per sub-lot	4
4.4 Minimum mass of sample	7
4.5 Mass of primary increment	8
4.6 Size analysis	9
5 Methods of sampling	10
5.1 General	10
5.2 Time-basis sampling	11
5.2.1 Method of taking primary increments	11
5.2.2 Sampling interval	11
5.2.3 Mass of increment	11
5.3 Mass-basis sampling	11
5.3.1 Method of taking primary increments	11
5.3.2 Sampling interval	11
5.3.3 Mass of increment	12
5.4 Stratified random sampling	12
5.4.1 General	12
5.4.2 Time-basis stratified random sampling	12
5.4.3 Mass-basis stratified random sampling	13
5.5 Reference sampling	13
6 Design of mechanical samplers	13
6.1 Safety	13
6.2 Information	13
6.3 Basic requirements	13
6.4 Location of sampling equipment	13
6.5 Provision for checking precision	13
6.6 Provision for testing for bias	14
6.7 General requirements for designing mechanical samplers	14
6.8 Design of falling-stream-type samplers	14
6.8.1 General	14
6.8.2 Cutter velocity	15
6.9 Cross-belt-type primary samplers	17
6.9.1 Operation	17
6.9.2 Design of cross-belt samplers	19
6.10 Maintenance and checking of sampling equipment	21
7 Handling and storage of samples	22
8 Sample preparation	22

9	Bias	23
9.1	Minimization of bias	23
9.2	Checking for precision and bias	24
10	Verification	24
Annex A (normative) Evaluation of sampling equipment for mass-basis sampling		25

ISO 13909-2:2025

<https://standards.itih.ai/catalog/standards/iso/e60ab92c-233e-45e0-bfb9-5ce8311a56d0/iso-13909-2-2025>

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO document should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

ISO draws attention to the possibility that the implementation of this document may involve the use of (a) patent(s). ISO takes no position concerning the evidence, validity or applicability of any claimed patent rights in respect thereof. As of the date of publication of this document, ISO had not received notice of (a) patent(s) which may be required to implement this document. However, implementers are cautioned that this may not represent the latest information, which may be obtained from the patent database available at www.iso.org/patents. ISO shall not be held responsible for identifying any or all such patent rights.

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT), see www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 27, *Coal and coke*, Subcommittee SC 4, *Sampling*.

This third edition cancels and replaces the second edition (ISO 13909-2:2016), which has been technically revised.

The main changes are as follows:

- the title has been changed to “Coal and coke” and aligned with the rest of the ISO 13909 series;
- the scope has been revised to specifically refer to coal;
- the calculation of number of sub-lots and increments has been updated;
- the references have been updated.

A list of all parts in the ISO 13909 series can be found on the ISO website.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.
