<b>Foreword</b>	<b>v</b>
<b>1 Scope</b>	<b>1</b>
<b>2 Normative references</b>	<b>1</b>
<b>3 Terms and definitions</b>	<b>1</b>
<b>4 Establishing a sampling scheme</b>	<b>1</b>
4.1 General	1
4.2 Design of the sampling scheme	2
4.2.1 Material to be sampled	2
4.2.2 Parameters to be determined on samples	2
4.2.3 Division of lots	2
4.2.4 Basis of sampling	2
4.2.5 Precision of sampling	3
4.2.6 Bias of sampling	3
4.3 Precision of results	3
4.3.1 Precision and total variance	3
4.3.2 Primary increment variance	4
4.3.3 Preparation and testing variance	4
4.3.4 Number of sub-lots and number of increments in each sub-lot	5
4.4 Minimum mass of sample	8
4.5 Mass of primary increment	8
4.6 Size analysis	9
<b>5 Methods of sampling</b>	<b>10</b>
5.1 General	10
5.2 Time-basis sampling	10
5.2.1 Method of taking primary increments	10
5.2.2 Sampling interval	10
5.2.3 Mass of increment	11
5.3 Stratified random sampling	11
5.3.1 General	11
5.3.2 Time-basis stratified random sampling	11
5.4 Reference sampling	11
<b>6 Design of mechanical samplers</b>	<b>11</b>
6.1 Safety	11
6.2 Sampling system	11
6.2.1 General	11
6.2.2 Checking for precision and bias	12
6.2.3 Operation of sampler	12
6.3 Location of sampling equipment	12
6.4 General requirements for designing mechanical samplers	12
6.5 Design of falling-stream-type samplers	13
6.5.1 General	13
6.5.2 Cutter velocity	16
6.6 Cross-belt-type primary samplers	16
6.6.1 Operation	16
6.6.2 Design of cross-belt samplers	17
6.6.3 Maintenance of sampling equipment	18
<b>7 Handling and storage of samples</b>	<b>19</b>
<b>8 Sample preparation</b>	<b>19</b>
<b>9 Minimization of bias</b>	<b>20</b>
9.1 General	20
9.2 Spacing of increments	20
9.3 Incorrectly extracted increments	20

## Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO document should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see [www.iso.org/directives](http://www.iso.org/directives)).

ISO draws attention to the possibility that the implementation of this document may involve the use of (a) patent(s). ISO takes no position concerning the evidence, validity or applicability of any claimed patent rights in respect thereof. As of the date of publication of this document, ISO had not received notice of (a) patent(s) which may be required to implement this document. However, implementers are cautioned that this may not represent the latest information, which may be obtained from the patent database available at [www.iso.org/patents](http://www.iso.org/patents). ISO shall not be held responsible for identifying any or all such patent rights.

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT), see [www.iso.org/iso/foreword.html](http://www.iso.org/iso/foreword.html).

This document was prepared by Technical Committee ISO/TC 27, *Coal and coke*, Subcommittee SC 4, *Sampling*.

This third edition cancels and replaces the second edition (ISO 13909-5:2016), which has been technically revised.

The main changes are as follows:

— the title has been modified and aligned with the rest of the ISO 13909 series;

A list of all parts in the ISO 13909 series can be found on the ISO website.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at [www.iso.org/members.html](http://www.iso.org/members.html).
