1 Scope 1

2 Normative references 2

3 Terms and definitions 2

4 Symbols (and abbreviated terms) 7

5 Conventions 8

5.1 Requirement structure 8
5.2 Test system description 9

6 Test architecture reference model 9
6.1 General information 9
6.2 Platform adapter interface 10
6.3 SUT adapter interfaces 10
6.4 Codecs 11

7 Test suite conventions 11
7.1 General information 11
7.2 Test suite structure (TSS) 11
7.3 Test profiles 13
7.4 Test suite identifiers 62
7.5 Test suite coverage 67
7.6 Test case description 184
7.7 Test case specification 185

8 Test case descriptions for 15118-2 V2GTP 198
8.1 General information 198
8.2 SECC test cases 198
8.3 EVCC test cases 202

9 Test case descriptions for 15118-2 SDP messages 208
9.1 General information 208
9.2 SECC test cases 208
9.3 EVCC test cases 211

10 Test case descriptions for 15118-2 V2G application layer messages 236
10.1 General information 236
10.2 SECC test cases 236
10.3 EVCC test cases 405

Annex A (normative) Configuration specifications 671

A.1 Timer configuration 671

A.2 PICS configuration 671

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation on the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT) see the following URL: www.iso.org/iso/foreword.html

This document was prepared by Technical Committee ISO/TC 22, *Road vehicles*, Subcommittee SC 31, *Electrical and electronic equipment*, and Technical Committee IEC/TC 69 *Electric road vehicles and electric industrial trucks*. The draft was circulated for voting to the national bodies of both ISO and IEC.
