
**Workplace air — Determination of
metals and metalloids in airborne
particulate matter by inductively
coupled plasma atomic emission
spectrometry —**

**Part 1:
Sampling**

*Air des lieux de travail — Détermination des métaux et métalloïdes
dans les particules en suspension dans l'air par spectrométrie
d'émission atomique avec plasma à couplage inductif —*

Partie 1: Prélèvement d'échantillons

Foreword	iv
Introduction	v
1 Scope	1
2 Normative references	1
3 Terms and definitions	2
4 Principle	2
5 Requirement	2
6 Sampling equipment	2
6.1 Samplers	2
6.2 Filters	3
6.3 Sampling pumps	3
6.4 Flowmeter	3
6.5 Ancillary equipment	3
7 Occupational exposure assessment	4
7.1 General	4
7.2 Personal sampling	4
7.3 Static sampling	4
7.4 Selection of measurement conditions and measurement pattern	4
7.4.1 General	4
7.4.2 Screening measurements of variation of concentration in time/and or space	4
7.4.3 Screening measurements of time-weighted average concentration and reasonable worst-case measurements	5
7.4.4 Measurements near an emission source	5
7.4.5 Measurements for comparison with limit values and periodic measurements	5
8 Sampling method	5
8.1 Preliminary considerations	5
8.1.1 Selection and use of samplers	5
8.1.2 Sampling period	6
8.1.3 Temperature and pressure effects	6
8.1.4 Handling of collection substrates	7
8.2 Preparation for sampling	7
8.2.1 Cleaning of samplers	7
8.2.2 Loading the samplers with collection substrates	7
8.2.3 Setting the volumetric flow rate	7
8.2.4 Field blanks	7
8.3 Sampling position	7
8.3.1 Personal sampling	7
8.3.2 Static sampling	8
8.4 Collection of samples	8
8.5 Transportation	9
9 Documentation	9
9.1 Sampling information	9
9.2 Information to accompany the request for analytical services	10
Annex A (informative) Sampler wall deposits	11
Annex B (informative) Guidance on filter selection	13
Annex C (informative) Temperature and pressure correction for the indicated volumetric flow rate	16
Bibliography	17

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT), see www.iso.org/iso/foreword.html.

This document was prepared by was prepared by Technical Committee ISO/TC 146, *Air quality*, Subcommittee SC 2, *Workplace atmospheres*.

This third edition cancels and replaces the second edition (ISO 15202-1:2012), which has been technically revised. The main changes compared to the previous edition are as follows:

- definitions that appear in ISO 18158 have been removed from this document, with ISO 18158 being added as a reference (replacing references to EN 1540);
- references to EN 482 have been replaced with ISO 20581, and references to EN 13890 have been replaced with ISO 21832;
- information regarding sampling pumps has been replaced with ISO 13137;
- the text has been editorially updated.

A list of all parts in the ISO 15202 series can be found on the ISO website.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.
