
**Intelligent transport systems —
Framework for collaborative
telematics applications for regulated
commercial freight vehicles (TARV) —**

**Part 22:
Freight vehicle stability monitoring**

*Systèmes intelligents de transport — Cadre pour applications
télématiques collaboratives pour véhicules de fret commercial
réglementé (TARV) —*

*Partie 22: Surveillance de la stabilité des véhicules de transport de
marchandises*

Foreword.....	v
Introduction.....	vi
1 Scope.....	1
2 Normative references.....	1
3 Terms and definitions.....	2
4 Symbols and abbreviated terms.....	6
5 Conformance.....	7
6 General overview and framework.....	7
7 Basic conceptual operational requirement.....	9
7.1 General.....	9
7.2 Basic requirements.....	10
8 Requirements for services using generic vehicle data.....	11
8.1 General.....	11
8.1.1 Unregulated application services using only generic <i>basic vehicle data</i>	11
8.1.2 Unregulated application services using both generic vehicle data and additional application specific data.....	11
8.2 Conveyance identifiers.....	11
9 Concept of operations for unregulated application services with additional data requirements including roadside sensors.....	12
9.1 General.....	12
9.2 Statement of the goals and objectives of the system.....	12
9.3 Strategies, tactics, policies, and constraints affecting the system.....	13
9.4 Organizations, activities, and interactions among participants and stakeholders.....	13
9.5 Operational roles and processes for the system.....	13
9.5.1 Common role of the prime service provider.....	13
9.5.2 Common role of the application service provider.....	14
9.5.3 Role of the application service.....	14
9.5.4 Service requirements definition.....	14
9.5.5 Common role of user.....	15
9.5.6 Role of driver.....	15
9.5.7 Role of operator.....	15
9.5.8 Framework for operation.....	15
9.5.9 ROAM 'app' library and data pantry.....	16
10 Sequence of operations for identified unregulated application services with additional data requirements.....	16
10.1 General.....	16
10.1.1 Overview.....	16
10.2 Quality of service requirements.....	20
10.3 Test requirements.....	21
10.4 Marking, labelling and packaging.....	21
11 Common features of unregulated TARV application services.....	21
11.1 Generic operational processes for the system.....	21
11.2 Common characteristics for instantiations of unregulated application services.....	23
11.3 Common sequence of operations for unregulated application services.....	24
11.4 Quality of service.....	24
11.5 Information security.....	24
11.6 Data naming content and quality.....	24
11.7 Software engineering quality systems.....	25
11.8 Quality monitoring station.....	25
11.9 Audits.....	25

11.10	Data access control policy	25
11.11	Approval of IVSs and service provider	25
11.12	Approval of road side sensors	25
12	Declaration of patents and intellectual property	25
Annex A	(informative) Application examples	26
Annex B	(informative) Vehicle stability monitoring sensor examples	30

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT) see www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 204, *Intelligent transport systems*.

A list of all parts in the ISO 15638 series can be found on the ISO website.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.
