
Copper and nickel sulfide ores and concentrates — Determination of total chlorine content — Alkaline fusion and potentiometric titration method

*Minerais et concentrés de sulfure de cuivre et de sulfure de nickel —
Détermination de la teneur totale en chlore — Méthode par fusion
alcaline et par titrage potentiométrique*

Foreword	iv
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Principle	2
5 Reagents	2
6 Apparatus	4
7 Instrument operating parameters	4
8 Sample	4
8.1 Laboratory sample.....	4
8.2 Test sample.....	5
9 Procedure	5
9.1 Number of blank testing.....	5
9.2 Number of determinations.....	5
9.3 Determination	5
9.3.1 General.....	5
9.3.2 Decomposition of the test portion by fusion with a mixture of carbonate salts.....	5
9.3.3 Decomposition of the test portion by fusion with a mixture of potassium salts.....	6
9.3.4 Oxidation of sulfide.....	7
9.3.5 Preparation of solution for titration.....	7
9.3.6 Potentiometric titration.....	7
10 Expression of results	8
11 Precision and accuracy	9
11.1 Expression of precision.....	9
11.2 Method for obtaining the final result.....	10
11.3 Precision between laboratories.....	10
11.4 Check of trueness.....	11
12 Test report	12
Annex A (informative) Procedure for the preparation and determination of the mass of a predried test portion	13
Annex B (normative) Flow chart of the procedure for the acceptance of analytical values for test samples	15

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT), see www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 183, *Copper, lead, zinc and nickel ores and concentrates*.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.
