Foreword	iv
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Operational procedure	1
4.1 General	1
4.2 CT system set-up	2
4.2.1 General	2
4.2.2 Geometry	2
4.2.3 X-ray source	3
4.2.4 Detector	3
4.3 Reconstruction parameters	3
4.4 Visualization	3
4.5 Analysis and interpretation of CT data	4
4.5.1 General	4
4.5.2 Feature testing/defect testing	4
4.5.3 Dimensional testing	4
5 Parameters and procedures for acceptable results	6
5.1 Image quality parameters	6
5.1.1 Contrast	6
5.1.2 Noise	8
5.1.3 Signal to noise ratio	9
5.1.4 Contrast to noise ratio	10
5.1.5 Spatial resolution	10
5.2 Suitability of testing	12
5.3 CT examination interpretation and acceptance criteria	12
5.4 Records and reports	13
5.5 Artefacts	13
5.5.1 General	13
5.5.2 Beam hardening artefacts	13
5.5.3 Edge artefacts	14
5.5.4 Scattered radiation	15
5.5.5 Instabilities	15
5.5.6 Ring artefacts	15
5.5.7 Centre of rotation error artefacts	16
5.5.8 Motion artefacts	17
5.5.9 Artefacts due to an insufficient number of projections	18
5.5.10 Cone beam artefacts	18
Annex A (informative) Spatial resolution measurement using line pair gauges	20
Bibliography	23

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO document should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

ISO draws attention to the possibility that the implementation of this document may involve the use of (a) patent(s). ISO takes no position concerning the evidence, validity or applicability of any claimed patent rights in respect thereof. As of the date of publication of this document, ISO had not received notice of (a) patent(s) which may be required to implement this document. However, implementers are cautioned that this may not represent the latest information, which may be obtained from the patent database available at www.iso.org/patents. ISO shall not be held responsible for identifying any or all such patent rights.

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT), see www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 135, *Non-destructive testing*, Subcommittee SC 5, *Radiographic testing*, in collaboration with the European Committee for Standardization (CEN) Technical Committee CEN/TC 138, *Non-destructive testing*, in accordance with the Agreement on technical cooperation between ISO and CEN (Vienna Agreement).

This second edition cancels and replaces the first edition (ISO 15708-3:2017), which has been technically revised.

The main changes are as follows:

- correction of [Figure 5](#);
- correction and reordering of content in [Clause 5](#);
- correction of definitions for N_C and N_A in [Formula A.1](#);
- correction of definition for σ in [Formula A.2](#);
- editorial changes.

A list of all parts in the ISO 15708 series can be found on the ISO website.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.
