3 Terms and definitions	1
4 Symbols and abbreviated terms	1
5 General parameters	2
5.1 Geomagnetic field variations.....	2
5.2 Quiet level and disturbance fields.....	2
5.3 K index (local 3 h range index).....	2
5.4 Kp, ΣKp , ap and Ap indices (planetary indices).....	3
5.4.1 General.....	3
5.4.2 Kp index (planetary 3 h range index).....	3
5.4.3 ΣKp index (planetary daily range index).....	3
5.4.4 ap index (planetary 3 h equivalent amplitude index).....	3
5.4.5 Ap index (planetary daily equivalent amplitude index).....	4
5.5 aa index (antipodal amplitude index).....	4
5.6 Dst index (storm time disturbance index).....	4
5.7 ASY and SYM indices (mid-latitude disturbance indices).....	5
5.8 AU, AL, AE and AO indices (auroral electrojet indices).....	5
5.9 am index.....	6
5.10 PC index.....	7
5.11 Time lag in the derivation and temporal resolution (sampling).....	7
6 Classification of prediction	8
6.1 General.....	8
6.2 Short-term prediction.....	8
6.3 Middle-term prediction.....	8
6.4 Long-term prediction.....	8
7 Methods of prediction	9
7.1 General.....	9
7.2 Prediction based on statistical models.....	9
7.2.1 Linear or non-linear prediction filter.....	9
7.2.2 Machine learning.....	9
7.2.3 Probabilistic prediction.....	9
7.3 Prediction based on physical principle.....	9
8 Evaluation of prediction efficiency	9
8.1 Definition of prediction error.....	9
8.2 Methods of evaluation.....	10
9 Compliance criteria	10
9.1 Rationale.....	10
9.2 Reporting.....	10
9.3 Documenting.....	10
9.4 Publishing.....	11
9.5 Archiving.....	11
10 Useful Informative Documents	11
Annex A (informative) Websites where geomagnetic indices are available	12
Annex B (informative) Websites where the space weather predictions and/or "now casting" are presented	13
Annex C (informative) Definition of various skill scores	14

Annex D (informative) Useful academic documents related with this document's fields are presented (These are not cited in the document)	15
Bibliography	22

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT) see www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 20, *Aircraft and space vehicles*, Subcommittee SC 14, *Space systems and operations*.

This second edition cancels and replaces the first edition (ISO 16698:2013), which has been technically revised. The main changes compared to the previous edition are as follows:

- addition of [5.9](#) and [5.10](#);
- update of reference lists of [Clause 6](#).

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.
