
**Welding — Micro joining of 2nd
generation high temperature
superconductors —**

**Part 2:
Qualification for welding and testing
personnel**

*Soudage — Micro-assemblage des supraconducteurs à haute
température de deuxième génération —*

Partie 2: Qualification du personnel en soudage et d'essai

Foreword	iv
Introduction	v
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Symbols and abbreviated terms	1
5 Qualification of personnel performing micro-joining and oxygenation annealing	1
5.1 General	1
5.2 Essential variables and range of qualification	2
5.3 Qualification methods	3
5.3.1 Qualification based on standard test joint specimen	3
5.3.2 Qualification by testing the test joints	3
5.4 Re-qualification	3
5.5 Qualification examination and examination report	4
5.6 Period of validity	4
5.6.1 Initial qualification	4
5.6.2 Confirmation of the validity	4
5.6.3 Prolongation of qualification	4
6 Qualification of personnel performing the test joints testing	4
6.1 General	4
6.2 Essential variables and range of qualification	5
6.3 Qualification methods	5
6.4 Re-qualification	6
6.5 Qualification examination and examination record	6
6.6 Period of validity	6
6.6.1 Initial qualification	6
6.6.2 Confirmation of the validity	6
6.6.3 Prolongation of qualification	6
7 Third-party check	6
Annex A (normative) Functional knowledge of micro-joining and oxygenation annealing apparatus	8
Annex B (normative) Knowledge of micro-joining and oxygenation annealing technology	9
Annex C (informative) Data report for micro-joining and oxygenation annealing, and testing of the test joints	11
Annex D (informative) Test results	14
Annex E (informative) Check list for qualification of personnel performing micro-joining, oxygenation annealing, and testing	16
Bibliography	19

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT) see www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 44, *Welding and allied processes*, Subcommittee SC 10, *Quality management in the field of welding*.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.

A list of all parts in the ISO 17279 series can be found on the ISO website.
