Foreword	iv
Introduction	v
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
3.1 Terms specific to biodiversity	1
3.2 Terms specific to the approaches of the organizations	2
4 Context of the biodiversity approach	5
4.1 Scope of the biodiversity approach	5
4.2 Review of existing policies, initiatives and actions	5
4.3 Consideration of interested parties	6
4.4 Staying updated	6
5 Involvement of interested parties	6
6 Identifying and prioritizing biodiversity impacts, dependencies, risks and opportunities	7
6.1 General	7
6.2 Identification of the material ecosystem services dependencies	7
6.3 Identification of the material impacts on biodiversity and ecosystem services	8
6.4 Identification of the material biodiversity-related risks and opportunities	8
6.5 Prioritization of the impacts, dependencies, risks and opportunities	10
7 Formalizing the biodiversity action plan	10
7.1 Organization's ambition	10
7.2 Defining objectives	10
7.3 Action planning	11
7.4 Setting indicators	12
7.5 Integrating the local context	12
8 Communication	12
8.1 General	12
8.2 Internal communication of results	13
8.3 External communication of results	13
9 Implementation, monitoring and review	13
9.1 Implementation	13
9.2 Monitoring indicators	13
9.3 Analysis of indicators' results	13
9.4 Continual improvement	14
Annex A (informative) Resources to support implementation of a biodiversity approach	15
Annex B (informative) DPSIR Framework applied to biodiversity	17
Bibliography	19

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO document should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

ISO draws attention to the possibility that the implementation of this document may involve the use of (a) patent(s). ISO takes no position concerning the evidence, validity or applicability of any claimed patent rights in respect thereof. As of the date of publication of this document, ISO had not received notice of (a) patent(s) which may be required to implement this document. However, implementers are cautioned that this may not represent the latest information, which may be obtained from the patent database available at www.iso.org/patents. ISO shall not be held responsible for identifying any or all such patent rights.

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT), see www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 331, *Biodiversity*.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.
