Introduction	vi
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Symbols and abbreviated terms	2
5 Usage of LTE in ITS	3
5.1 LTE features used in ITS	3
5.2 Device-to-device communications (D2D)	3
5.3 D2D communication basics	5
5.3.1 General	5
5.3.2 User plane	5
5.3.3 Control plane	6
5.4 Service authorization	6
5.5 SideLink communication related identities	7
6 General requirements	7
7 ITS station	8
7.1 ITS station and communication architecture	8
7.2 Service access points	9
7.2.1 General	9
7.2.2 Communications service access points	10
7.2.3 Management service access points	10
7.2.4 Security service access points	10
8 Communication interface (CI) protocol stack	10
8.1 Physical layer	10
8.2 Data link layer	10
8.2.1 Basic behaviour	10
8.2.2 Data link layer communication addresses	10
8.2.3 Identification of higher layer protocols	10
8.3 Communication adaptation sub-layer	11
9 Communication interface (CI) management	11
9.1 Basic management	11
9.2 Management adaptation entity (MAE)	11
9.2.1 LTE-D2D parameters and I-Parameters	11
9.2.2 LTE-D2D management commands and MI-SAP commands and requests	11
10 Procedures	12
10.1 Communication interface (CI) procedures	12
10.1.1 Transmit procedure	12
10.1.2 Receive procedure	12
10.2 Management procedures	12
10.2.1 Cross-CI prioritization	12
10.2.2 Operational mode	12
10.2.3 LTE-D2D MAC address mapping	12
10.2.4 CI connection procedure	14
10.2.5 CI state management	14
11 Conformance	14
12 Test methods	14
Annex A (normative) Communication interface (CI) parameters	15

Annex B (normative) MI-COMMANDs	18
Annex C (normative) MI-REQUESTs	19
Annex D (normative) ASN.1 definitions	20
Annex E (informative) CI state transitions	23
Bibliography	25

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT), see www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 204, *Intelligent transport systems*.

A list of all parts in the ISO 17515 series can be found on the ISO website.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.
