
**Road Vehicles — Aerosol separator
performance test for internal
combustion engines —**

**Part 4:
Laboratory fractional efficiency test
method**

*Véhicules Routiers — Essai de performance du séparateur d'aérosols
pour les moteurs à combustion interne —*

Partie 4: Méthode d'essai de l'efficacité fractionnelle en laboratoire

Foreword	v
Introduction	vi
1 Scope	1
2 Normative references	1
3 Terms, definitions, and abbreviated terms	1
3.1 Terms and definitions	1
3.2 Abbreviated terms	2
4 Measurement accuracy	2
5 Test materials and conditions	2
5.1 Absolute filter, wall flow trap and leakage	2
5.2 Test temperature	2
5.3 Test conditions	2
6 Test procedure	3
6.1 General	3
6.2 Test equipment	3
6.3 Aerosol generator	4
6.4 Aerosol sampling system	4
6.5 Particle sizing and counting monitor(s)	5
7 Apparatus qualification testing	5
7.1 Test stand verification	5
7.2 Concentration limit of the particle instrument	6
7.3 100 % efficiency test and development of purge time	6
7.4 Correlation test	6
7.5 Test duct air leakage test	6
7.6 Apparatus maintenance	7
8 Fractional efficiency test	7
8.1 General	7
8.1.1 New state (if possible)	7
8.1.2 Conditioned state as per ISO/TS 17536-2	7
8.2 Method	7
8.3 Calculations	7
8.4 Correlation and tare	7
8.5 Fractional efficiency test	8
9 Calculations and data acceptance criteria	9
9.1 Symbols used in following formulae	9
9.2 Symbols	9
9.3 Subscripts used in the following formulae	9
9.4 Average used in the following formulae	9
9.5 Test sampling	9
9.6 Correlation ratio	11
9.7 Penetration / Fractional efficiency	12
9.8 Efficiency	12
9.9 Data reduction	12
9.9.1 Correlation ratio data reduction	12
9.9.2 Correlation ratio data acceptance criteria	15
9.9.3 Penetration data reduction	15
9.9.4 Penetration Data Acceptance Criteria	17
9.9.5 Penetration maximum background counts	18
9.9.6 Penetration minimum upstream counts	18
9.9.7 Efficiency	18

Annex A (normative) Poisson statistics	19
Annex B (informative) Aerosol separator laboratory fractional efficiency test report	21
Annex C (normative) Test equipment	23
Bibliography	25

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT) see www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 22, *Road vehicles*, Subcommittee SC 34, *Propulsion, powertrain and powertrain fluids*.

A list of all parts in the ISO 17536 series can be found on the ISO website.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.
