
**Textiles — Method for the detection
and determination of alkylphenol
ethoxylates (APEO) —**

**Part 2:
Method using NPLC**

*Textiles — Méthode de détection et de détermination des alkylphénols
éthoxylés (APEO) —*

Partie 2: Méthode utilisant la CLPN

1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Principle	1
5 Reagents	1
6 Apparatus	2
7 Procedure	3
7.1 Standard preparation	3
7.2 Mobile phase for HPLC	3
7.2.1 Methanol with 0,1 % formic acid and 0,01 % ammonium formate	3
7.2.2 Acetonitrile with 0,1 % formic acid	3
7.3 Sample preparation	3
7.4 Sample extraction	3
7.5 Sample analysis	4
8 Calculation and calibration	4
8.1 Calculation of contribution percentage of each APEO congener in standard solution	4
8.2 Calculation of concentration of each APEO congener in standard solution	4
8.3 Calculation of concentration of each APEO congener in sample	4
8.4 Calculation of total concentration of all APEO congener in sample	5
8.5 Calibration curve	5
9 Test report	5
Annex A (informative) Examples of chromatographic condition	6
Annex B (informative) Examples of solid phase extraction (SPE) procedure for clean up	14
Annex C (informative) Results of the interlaboratory test	15
Annex D (informative) Study of the contribution percentage (mole fraction) of APEO congeners	16
Bibliography	18

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT) see www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 38, *Textiles*.

A list of all parts in the ISO 18254 series can be found on the ISO website.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.
