Foreword	iv
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
3.1 General terms.....	1
3.2 Terms related to the production method.....	4
3.3 Terms related to visual effects and veneer matching.....	5
3.4 Terms related to features, defects and repairs.....	8
4 Determination of physical characteristics	10
4.1 Apparatus.....	10
4.2 Determination of moisture content.....	11
4.2.1 Principle.....	11
4.2.2 Test pieces.....	11
4.2.3 Procedure.....	11
4.2.4 Expression of results.....	11
4.3 Determination of density.....	12
4.4 Determination of dimensions.....	12
4.4.1 Principle.....	12
4.4.2 Procedure.....	12
4.4.3 Expression of results.....	14
4.5 Determination of squareness.....	14
4.6 Test report.....	15
5 Dimensional tolerances	15
5.1 Reference moisture content.....	15
5.2 Tolerances for length and width.....	16
5.3 Tolerances for thickness.....	16
Annex A (informative) Schemes of veneer production methods	17
Annex B (informative) Schemes of veneer matching methods	18
Bibliography	19

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation on the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT) see the following URL: www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 89, *Wood-based panels*, Subcommittee SC 3, *Plywood*.

This second edition cancels and replaces the first edition (ISO 18775:2008), which has been technically revised.

The main changes compared to the previous edition is as follows:

- an editorial change was done to precise a threshold value in [Table 1](#).

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.
