
**Road vehicles — Connection interface
for pyrotechnic devices, two-way and
three-way connections —**

**Part 4:
Pyrotechnic device and harness
connector assembly - type 2**

*Véhicules routiers — Interface de raccordement pour dispositifs
pyrotechniques, deux voies et trois voies —*

*Partie 4: Assemblage du dispositif pyrotechnique et du connecteur
faisceau - type 2*

ISO 19072-4:2019

<https://standards.iteh.ai/catalog/standards/iso/e4ef231f-82d5-4de5-ba2a-a83f81501839/iso-19072-4-2019>

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT) see www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 22, *Road vehicles*, Subcommittee SC 32, *Electrical and electronic components and general system aspects*.

This first edition of ISO 19072 cancels and replaces ISO/TS 19072-4:2012, which has been technically revised.

The main changes are as follows:

- coding version IV for two-way has been removed;
- coding version IV and V for three-way has been added;
- [Table 1](#) has been adjusted;
- there has been a dimensional review;
- [Figure 5](#) has been added;
- [Annex B](#) has been added.

A list of all parts in the ISO 19072 series can be found on the ISO website.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.
