
**Steel wire ropes — Pre-fabricated
parallel wire strands for suspension
bridge main cable — Specifications**

*Câbles en acier — Câbles à fils parallèles préfabriqués pour câble
porteur de pont suspendu — Spécifications*

Foreword	iv
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Designation of product	5
5 Requirements	5
5.1 Traceability	5
5.2 Lengths and fabrication tolerances	5
5.3 Material and manufacture	6
5.4 Mechanical property	7
5.4.1 Tensile property	7
5.4.2 Modulus of elasticity	7
5.4.3 Fatigue property	7
6 Test methods	8
6.1 Material test	8
6.2 Tensile test of PPWS	8
6.3 Modulus of elasticity	8
6.4 The test of socketing process	9
6.5 Fatigue test	9
7 Inspection	9
7.1 Inspection and inspection documents	9
7.2 Acceptance unit, number of samples and test pieces	9
7.3 Evaluation of test results for mechanical, chemical, and coating properties	10
7.4 Sorting and reprocessing	10
8 Identification and marking	10
9 Storage and handling	11
10 Transportation	11
Annex A (normative) Cross-sectional layout of PPWS	12
Annex B (informative) Sectional dimensions, nominal length mass of PPWS	13
Annex C (informative) Nominal breaking force	14

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT) see www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 105, *Steel wire ropes*.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.
