
**Radiological protection —
Measurement for the clearance
of waste contaminated with
radioisotopes for medical
application —**

**Part 1:
Measurement of radioactivity**

*Radioprotection — Mesurage pour la libération des déchets
contaminés par des radioisotopes lors des applications médicales —
Partie 1: Mesurage de la radioactivité*

Foreword	iv
Introduction	v
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Fundamentals	2
4.1 Radioisotopes for medical application	2
4.1.1 General	2
4.1.2 Nuclear medicine	3
4.1.3 Radiation therapy	3
4.2 Application of clearance level	4
4.3 Classification and characteristics of radioactive waste	5
5 Measurement method and procedure	5
5.1 General	5
5.2 Procedure for ^{125}I	6
5.3 Procedure for other radionuclides	6
6 Requirements	7
6.1 Control of the radioactive waste to be stored for disposal	7
6.2 Measurement before storage	7
6.3 Storage of radioactive waste	7
6.4 Disposal method	7
7 Uncertainty	8
8 Documentation of radioactivity measurement results	8
9 Reporting of results	8
10 Quality control	9
Annex A (informative) Example of the procedure for the clearance of radioactive waste	10
Annex B (informative) Measurement result of the radioactivity of the radioactive waste	14
Bibliography	18

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation on the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT) see the following URL: www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 85, *Nuclear energy nuclear technologies and radiological protection*, Subcommittee SC 2, *Radiation protection*.

A list of all the parts in the ISO 19461 series can be found on the ISO website.
