
**Traditional Chinese medicine —
Quality and safety of raw materials
and finished products made with raw
materials —**

Part 2:
**Identity testing of constituents of
herbal origin**

*Médecine traditionnelle chinoise — Qualité et sécurité des matières
premières et des produits finis fabriqués à partir de matières
premières —*

Partie 2: Identification des constituants d'origine végétale

Foreword	iv
Introduction	v
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Minimum requirements for the testing of the identity of starting materials and finished products	2
5 Requirements for macroscopic, microscopic and organoleptic description tests	3
5.1 General.....	3
5.2 Macroscopic description test.....	4
5.2.1 Application.....	4
5.2.2 Macroscopic examination.....	4
5.2.3 Assessment.....	4
5.3 Microscopic description test.....	4
5.3.1 Application.....	4
5.3.2 Microscopic examination.....	4
5.3.3 Assessment.....	4
5.4 Organoleptic description test.....	5
5.4.1 Application.....	5
5.4.2 Organoleptic examination.....	5
5.4.3 Assessment.....	5
6 Chromatographic identification tests with HPLC and TLC	5
6.1 General.....	5
6.2 Sample preparation.....	6
6.2.1 General.....	6
6.2.2 Reagents.....	6
6.2.3 Apparatus.....	7
6.2.4 Sample preparation method for solids.....	7
6.2.5 Sample preparation method for semi-solid materials.....	7
6.2.6 Sample preparation method for liquids.....	8
6.2.7 Solid-phase extraction (SPE).....	9
6.2.8 Test solution.....	9
6.3 Identification of constituents with HPLC and diode array detection.....	9
6.3.1 General.....	9
6.3.2 HPLC fingerprint testing method.....	9
6.4 Identification of typical constituents with TLC.....	11
6.4.1 Group selected identification tests with TLC.....	11
7 Chemical identification tests	16

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT), see www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 249, *Traditional Chinese medicine*.

A list of all parts in the ISO 19609 series can be found on the ISO website.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.
