Foreword	iv
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Principle	2
5 Apparatus	3
5.1 Apparatus arrangement	3
5.2 Optical module of interferometer	4
5.3 Reference flat	4
5.4 Standard mirror	4
5.5 Image sensor	4
5.6 Computer data collecting, processing and displaying system	4
5.7 Thickness measurement equipment	4
6 Test conditions	4
6.1 Temperature	4
6.2 Relative humidity	4
6.3 Vibration isolation	4
6.4 Airflow	5
7 Sample	5
7.1 Outline	5
7.1.1 Wedge shaped sample	5
7.1.2 Parallel plane sample	5
7.2 Thickness	5
7.3 Wedge angle	5
7.4 Polished surfaces	6
7.4.1 Wedge shaped sample	6
7.4.2 Parallel plane sample	6
8 Procedure	6
8.1 Four-step method	6
8.2 Two-step method	7
9 Data processing	7
9.1 Calculation of refractive index error distribution with the four-step method	7
9.2 Calculation of refractive index error distribution with the two-step method	8
9.3 Calculation of the PV value and the standard deviation value of refractive index	8
10 Calculation of measurement value and measurement uncertainty	8
10.1 Calculation of measurement value	8
10.2 Calculation of measurement uncertainty	9
10.3 Frequency of measuring sample	9
11 Expanded uncertainty of the measurement	9
12 Test Report	9
Annex A (informative) Infrared interferometer	11
Annex B (informative) Temperature stability for homogeneity measurements	14
Annex C (informative) Flatness of sample	16
Annex D (informative) Test record for homogeneity of infrared optical materials	18
Bibliography	19

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation on the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT) see the following URL: www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 172, *Optics and photonics*, Subcommittee SC 3, *Optical materials and components*.
