Foreword	iv
Introduction	v
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Design considerations for increasing accessibility of information and marking for packaging	2
4.1 General design consideration	2
4.1.1 Considerations of diverse users and diverse contexts of use	2
4.1.2 Use of alternative or multiple means of presentation	2
4.1.3 Use of simple and clear information	3
4.1.4 Highlighting information and marking of importance	3
4.1.5 Limited amount of information and marking	3
4.1.6 Location of information	3
4.1.7 Additional marking and signage placement	4
4.2 Design considerations required from human abilities and characteristics	4
4.2.1 Luminance contrast	4
4.2.2 Colour and colour combination	4
4.2.3 Letters and legibility	5
4.2.4 Graphic symbols and pictograms	6
4.2.5 Languages	6
4.2.6 Use of tables	6
4.2.7 Avoidance of glare	6
4.2.8 Tactile marking	6
4.2.9 Braille signage	7
4.2.10 Auditory signals	7
4.3 Design considerations specific to packaging	7
4.3.1 Opening	7
4.3.2 Use	8
4.3.3 Storage	8
4.3.4 Disposal	8
4.3.5 Others	8
4.4 Design considerations related to safety	9
5 Evaluation of information and marking	9
5.1 General	9
5.2 Instrument-based evaluation	9
5.3 User-based evaluation	9
6 Conformance	10
Annex A (informative) Types of disabilities for human functions	11
Annex B (informative) Appropriate dimensions of tactile markings	13
Annex C (informative) Designer's checklist	14
Annex D (informative) Checklist for conformance with this document	16
Bibliography	18

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation on the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT), see the following URL: www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 122, *Packaging*.
