Foreword	iv
Introduction	v
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Requirements for the protector	3
4.1 Performance requirements	3
4.1.1 Laser pulse and exposure duration	3
4.1.2 Optical density (OD)	4
4.1.3 Transmittance to short pulses	4
4.1.4 Resistance category (RC)	4
4.1.5 Luminous transmittance	4
4.1.6 Dynamic protection	5
4.1.7 Field of view	5
4.1.8 Refractive power of filters and protectors	5
4.2 Construction of protectors	5
4.3 Robustness of protectors	6
4.3.1 Basic requirement	6
4.3.2 Optional requirements	6
4.4 Quality of material and surface of filters	6
4.4.1 Material and surface defects	6
4.4.2 Scattered light	6
4.5 Environmental stability	6
4.5.1 General	6
4.5.2 Filter and protector resistance to heat and humidity	7
4.5.3 Stability to ultraviolet radiation	7
4.5.4 Resistance of filters and frames to ignition by contact with hot surfaces	7
4.6 Marking	8
4.6.1 Marking requirements	8
4.6.2 Marking syntax and examples of marking	9
4.7 Manufacturer's instruction and information	12
4.8 Requirements not mandatory for protectors worn by patients during medical or aesthetic treatment with lasers	13
5 Test methods	13
5.1 General	13
5.2 Optical density	15
5.3 Transmittance of short pulses	15
5.4 Resistance of filters and frames to laser radiation	15
5.5 Luminous transmittance of filters	17
5.6 Scattered light	17
5.7 Resistance to elevated temperature	17
Bibliography	18

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT), see www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 94, *Personal safety — Personal protective equipment*, Subcommittee SC 6, *Eye and face protection*, in collaboration with the European Committee for Standardization (CEN) Technical Committee CEN/TC 85, *Eye protective equipment*, in accordance with the Agreement on technical cooperation between ISO and CEN (Vienna Agreement). The document was developed as a joint project with IEC/TC 76, *Optical radiation safety and laser equipment*.

This first edition of ISO 19818-1 cancels and replaces the first edition of ISO 6161:1981, which has been technically revised.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.
