Foreword	iv
Introduction	v
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Calculation of heat flow rate and heat capacity	1
4.1 Temperature modulation, $T(t)$	1
4.2 Heating rate.....	2
4.3 Heat flow rate $\Phi(t)$ and heat capacity.....	2
4.3.1 General.....	2
4.3.2 Heat capacity with no processes.....	3
4.3.3 Heat capacity with additional processes.....	4
4.3.4 Time dependent heat capacity.....	5
5 Principles	5
5.1 General.....	5
5.2 Mode of temperature modulation.....	5
5.2.1 Variable heating rate of periodic modulation.....	5
5.2.2 Variable temperature modulated mode.....	6
5.3 Heat capacity determined with the temperature modulation — Complex heat capacity.....	7
5.4 Reversing and non-reversing heat capacity.....	8
5.5 Advantage of the temperature modulation applied to DSC.....	8
6 Apparatus and materials	11
6.1 General.....	11
6.2 Temperature control of modulated differential scanning calorimeter.....	11
7 Calibration	12
7.1 General.....	12
7.2 Calibration of modulation amplitude.....	12
7.3 Calibration of phase.....	12
8 Procedure	12
8.1 General.....	12
8.2 Experimental conditions.....	13
8.3 Interpretation of results.....	13
9 Test report	13
Annex A (informative) Generalized theory of temperature modulated DSC [7].....	14
Bibliography	16

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation on the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT) see the following URL: www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 61, *Plastics*, Subcommittee SC 5, *Physical-chemical properties*.

A list of all parts in the ISO 19935 series can be found on the ISO website.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.
