|------------------------------------------------------------------------------------------------------------------------|-----------|
| <b>Foreword</b> .....                                                                                                  | <b>iv</b> |
| <b>Introduction</b> .....                                                                                              | <b>v</b>  |
| <b>1 Scope</b> .....                                                                                                   | <b>1</b>  |
| <b>2 Normative references</b> .....                                                                                    | <b>1</b>  |
| <b>3 Terms and definitions</b> .....                                                                                   | <b>1</b>  |
| <b>4 General considerations</b> .....                                                                                  | <b>5</b>  |
| <b>5 Outside the laboratory</b> .....                                                                                  | <b>6</b>  |
| 5.1 Specimen collection.....                                                                                           | 6         |
| 5.1.1 Information about the specimen donor/patient.....                                                                | 6         |
| 5.1.2 Selection of the venous whole blood collection tube by the laboratory.....                                       | 6         |
| 5.1.3 Venous whole blood specimen collection from the donor/patient and stabilization procedures.....                  | 6         |
| 5.1.4 Information about the specimen and storage requirements at the blood collection facility.....                    | 7         |
| 5.2 Transport requirements.....                                                                                        | 8         |
| <b>6 Inside the laboratory</b> .....                                                                                   | <b>8</b>  |
| 6.1 Specimen reception.....                                                                                            | 8         |
| 6.2 Storage requirements.....                                                                                          | 8         |
| 6.3 Isolation of the cellular RNA.....                                                                                 | 9         |
| 6.3.1 General.....                                                                                                     | 9         |
| 6.3.2 Using blood collection tubes with RNA profile stabilizers.....                                                   | 9         |
| 6.3.3 Using blood collection tubes without RNA profile stabilizers.....                                                | 10        |
| 6.4 Quantity and quality assessment of isolated cellular RNA.....                                                      | 10        |
| 6.5 Storage of isolated cellular RNA.....                                                                              | 11        |
| 6.5.1 General.....                                                                                                     | 11        |
| 6.5.2 Cellular RNA isolated with commercially available kits.....                                                      | 11        |
| 6.5.3 Cellular RNA isolated with the laboratory's own protocols.....                                                   | 11        |
| <b>Annex A (informative) Impact of pre-examination process steps on venous whole blood cellular RNA profiles</b> ..... | <b>12</b> |
| <b>Annex B (informative) Influence of blood storage temperature on blood cellular RNA profiles</b> .....               | <b>16</b> |
| <b>Bibliography</b> .....                                                                                              | <b>19</b> |

## Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see [www.iso.org/directives](http://www.iso.org/directives)).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see [www.iso.org/patents](http://www.iso.org/patents)).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT) see [www.iso.org/iso/foreword.html](http://www.iso.org/iso/foreword.html).

This document was prepared by Technical Committee ISO/TC 212, *Clinical laboratory testing and in vitro diagnostic test systems*.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at [www.iso.org/members.html](http://www.iso.org/members.html).

A list of all parts in the ISO 20186 series can be found on the ISO website.
