
Film for wrapping rubber bales —

Part 3:

**Ethylene-propylene-diene rubber (EPDM),
acrylonitrile-butadiene rubber (NBR),
hydrogenated nitrile-butadiene rubber
(HNBR), acrylic-ethylene rubber (AEM)
and acrylic rubber (ACM)**

Emballage des balles en caoutchouc —

*Partie 3: Caoutchouc éthylène-propylène-diène (EPDM), caoutchouc
butadiène-acrylonitrile (NBR), caoutchouc butadiène-nitrile hydrogéné
(HNBR), caoutchouc éthylène acrylique (AEM) et caoutchouc acrylique
(ACM)*

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 2.

The main task of technical committees is to prepare International Standards. Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights.

ISO 20299-3 was prepared by Technical Committee ISO/TC 45, *Rubber and rubber products*, Subcommittee SC 3, *Raw materials (including latex) for use in the rubber industry*.

ISO 20299 consists of the following parts, under the general title *Film for wrapping rubber bales*:

- *Part 1: Butadiene rubber (BR) and styrene-butadiene rubber (SBR)*
- *Part 2: Natural rubber*
- *Part 3: Ethylene-propylene-diene rubber (EPDM), acrylonitrile-butadiene rubber (NBR), hydrogenated nitrile-butadiene rubber (HNBR), acrylic-ethylene rubber (AEM) and acrylic rubber (ACM)*
