3 Terms and definitions	2
4 Abbreviated terms	5
5 Safety requirements and/or protective/risk reduction measures	5
5.1 General requirements for powered elevators	5
5.2 Mechanical strength	5
5.3 Safety design of powered elevators	5
5.3.1 General	5
5.3.2 Ergonomic design	5
5.3.3 Fastening methods and DROPS prevention of parts	5
5.3.4 Suspension points	6
5.3.5 Moving parts, pinch points and guards	6
5.4 Other protective measures	7
5.4.1 Risks due to surfaces, edges or angles	7
5.4.2 Size and type verification (errors of fitting)	7
5.4.3 Static electricity	7
5.4.4 Loss of stability	7
5.4.5 Explosion prevention	7
5.4.6 Controls	7
5.4.7 Elevator coating	7
5.4.8 Noise	8
5.5 Specific risks for powered elevators	8
5.5.1 General	8
5.5.2 External power source	8
5.5.3 Feedback signals	8
5.5.4 Danger zone	8
5.6 Stops for an assembly of machinery	9
5.6.1 General	9
5.6.2 Start of the movement	9
5.6.3 Normal stop	9
5.6.4 Operational stop	9
5.6.5 Emergency shutdown	9
5.7 Failure of power supply	10
5.8 Verification of safety requirements and/or protective/risk reduction measures	10
5.8.1 General	10
5.8.2 Service life	10
5.8.3 Fatigue life	10
5.8.4 Maintenance	10
6 Functions for preparing the elevator for a safe lift — Wrapping, securing, locking and verification	10
6.1 General	10
6.2 Black box approach	11
6.3 Wrapping	11
6.4 Securing	12
6.5 Locking	13
6.6 Verification of readiness for safe lift	13
7 Closed-ring powered elevator	14
7.1 Wrapping	14
7.2 Securing and locking	14

7.3	Verification	14
8	Instructions for use	14
8.1	General	14
8.2	Instruction handbook	14
9	Marking of powered elevators	17
Annex A	(informative) Relation between the clauses of European Directive on machinery (Directive 2006/42/EC) and this document	19
Annex B	(normative) Verification tests for powered elevators	23

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT) see www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 67, *Materials, equipment and offshore structures for petroleum, petrochemical and natural gas industries*, Subcommittee SC 4, *Drilling and production equipment*, in collaboration with the European Committee for Standardization (CEN) Technical Committee CEN/TC 12, *Materials, equipment and offshore structures for petroleum, petrochemical and natural gas industries*, in accordance with the Agreement on technical cooperation between ISO and CEN (Vienna Agreement).

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.
