Foreword	iv
Introduction	v
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Principle	4
4.1 General	4
5 Sampling strategy	5
5.1 General	5
5.2 Primary sample type	6
5.3 Primary sample stabilization and storage	6
5.4 Primary sample transportation	6
5.5 DNA/RNA isolation	7
5.6 DNA/RNA sample quality	7
6 Nucleic acid library preparation	7
7 Design and review process including sequencing strategy and assessment	7
7.1 General	7
7.2 Short read	7
7.3 Long read	8
7.4 Hybrid assembly	8
7.5 Sample preparation and library construction	8
7.6 Assessment	8
8 Database construction	9
8.1 General	9
8.2 Public database	9
8.3 Self-built database	9
9 Bioinformatics analysis	10
9.1 General	10
9.2 Identification list of microorganisms	11
10 Validation and verification	11
10.1 General	11
10.2 In silico sequence control for bioinformatics pipeline evaluation	11
10.3 Real sample control for pipeline evaluation	11
11 Evaluation	12
12 Test report	12
12.1 General	12
12.2 Test report content	12
Annex A (informative) Checklist for NA sample quality assessment before library construction	13
Annex B (informative) Methods for sample stabilization and storage	14
Annex C (informative) Bioinformatics pipeline	15
Bibliography	17

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO document should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

ISO draws attention to the possibility that the implementation of this document may involve the use of (a) patent(s). ISO takes no position concerning the evidence, validity or applicability of any claimed patent rights in respect thereof. As of the date of publication of this document, ISO had not received notice of (a) patent(s) which may be required to implement this document. However, implementers are cautioned that this may not represent the latest information, which may be obtained from the patent database available at www.iso.org/patents. ISO shall not be held responsible for identifying any or all such patent rights.

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT), see www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 276 *Biotechnology*, Subcommittee SC 1, *Analytical methods*.

A list of all parts in the ISO 20397 series can be found on the ISO website.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.
