Foreword	iv
Introduction	v
1 Scope	1
2 Normative references	1
3 Terms, definitions, and abbreviated terms	1
3.1 Terms and definitions.....	1
3.2 List of abbreviated terms.....	4
4 Concepts of membrane filtration technology for water reuse	5
4.1 General.....	5
4.2 Membrane type and treatment objectives.....	5
4.3 Filtration unit process.....	6
4.4 Membrane filtration process design and pre- and post-shipment tests.....	7
5 Principles and general guidelines for performance evaluation	7
5.1 General.....	7
5.2 Functional requirements for membrane filtration process.....	7
5.3 Non-functional requirements for membrane filtration process.....	8
6 Performance evaluation for functional requirement	8
6.1 General.....	8
6.2 Water quality based performance evaluation.....	8
6.3 Process based performance evaluation.....	9
6.4 Integrity monitoring.....	9
6.4.1 Direct Integrity Monitoring.....	9
6.4.2 Indirect integrity monitoring.....	11
7 Performance evaluation for non-functional requirements	12
7.1 General.....	12
7.2 Energy consumption.....	12
7.3 Chemical consumption.....	13
7.4 Brine water disposal or treatment.....	13
7.5 Solid waste for disposal.....	14
7.6 Life cycle cost.....	14
Annex A (informative) Examples of parameters on the specification sheet	15
Annex B (informative) Recommended frequency of data collection	17
Annex C (informative)	18
Bibliography	19

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation on the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT) see the following URL: www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 282, *Water Reuse*, Subcommittee SC 3, *Risk and performance evaluation of water reuse systems*.

A list of all parts in the ISO 20468 series can be found on the ISO website.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.
